## PRESENTACIÓN

El presente documento denominado “Directrices y Lineamientos Técnico-Administrativos en las modalidades de Educación de Personas Jóvenes y Adultas”, es el producto de un proceso de coordinación de la Dirección Curricular en los Departamentos de Educación de Personas Jóvenes y Adultas, Tercer Ciclo y Educación Diversificada, I y II Ciclos, Evaluación de los Aprendizajes y la Dirección de Educación Técnica y Capacidades Emprendedoras del Ministerio de Educación Pública.

Esta coordinación involucra autoridades nacionales, regionales, así como docentes, estudiantes, padres de familia y organizaciones gubernamentales y no gubernamentales, que apoyan y fortalecen la Educación de Personas Jóvenes y Adultas (EPJA), para obtener mayor cobertura, equidad, inclusión y calidad en los procesos educativos.

El propósito de este documento es garantizar el uso transparente y eficiente de los recursos públicos disponibles para los servicios educativos y la puesta en práctica de las diferentes modalidades de la Educación de Personas Jóvenes y Adultas (EPJA).

El Departamento de Educación de Personas Jóvenes y Adultas (DEPJA) de la Dirección de Desarrollo Curricular, es el ente técnico responsable de analizar, formular, planificar, asesorar, investigar, evaluar y divulgar todos los aspectos relacionados con el currículo de la educación de personas jóvenes y adultas y la prestación del servicio de educación pública en los ciclos, niveles y modalidades de la EPJA que se encuentran debidamente autorizados.

Los lineamientos técnicos para las modalidades EPJA dadas en este documento, mantienen el sustento en la Política Educativa actual y en el marco legal vigente.

## Purpose

The purpose of studying English in the Educational System is the development of the learner's communicative competence as well as the knowledge, skills, abilities, values, and competences of a 21st century citizen. This requires the implementation of innovative communicative language teaching methodologies. These methodologies are supported by principles established in the Common European Framework of Reference for languages (CEFR), the Action-Oriented Approach and the Educating for a New Citizenship Policy pillars: Sustainable Development, Digital Citizenship and Global Citizenship.

Education for a new citizenship envisions learners as active agents of change able to:

- use knowledge, skills, and abilities beyond school contexts.
- express their own points of view.
- practice peaceful conflict resolution and search for democratic solutions.
- harmonize social and economic development and environmental sustainability.

- take action in favor of sustainability of local, national and global resources.
- be aware of a global world where national borders have become more diffused.
- use ICTs and access to knowledge networks as tools for communication, innovation, and proactive social service.
- reflect and use critical thinking processes.
- be compassionate national and global citizens.
- practice democratic principles such as freedom of expression and religion, respect for plurality and cultural diversity (sexual, linguistic, and ethnic) as stated in the Costa Rican Constitution.
- defend and protect Human Rights and be against all forms of discrimination.

### **The Common European Framework of Reference for Languages in the Costa Rican Context**

The CEFR for Languages is used in the English curricular reform as a reference for the following considerations:

- It provides a common basis for the development of language syllabi, curriculum guidelines, textbooks, and assessment.
- It describes what language learners do at different levels of proficiency within particular domains and scenarios.
- It defines 6 reference levels of proficiency, defined by means of appropriate “Can Do” performance descriptors to assess learners’ performance at each stage.
- It provides a common terminology that can be adapted for all languages and educational contexts.

The CEFR defines communication as a social act, where learners are social agents, developing a range of general and specific communicative language competences, moving from learning about the language to learning to communicate in the language in active, spontaneous, and authentic language interaction. Most of the tasks to be accomplished have a meaningful communication objective, for example, solving a problem in a given scenario.

The CEFR defines competences as “the sum of knowledge, skills and characteristics that allow a person to perform actions in society.” (p.9). They are comprised of general and specific competences as shown in the following charts. General competences consist of knowledge, skills, and abilities to learn and existential competence that are not language-specific but learners use them when performing all kinds of actions including language activities.

Table 1: General Competences

General Competences			
Declarative Knowledge	Skills and know-How	Existential knowledge	Ability to Learn
Resulting from empirical and formal knowledge	Ability to carry out metacognitive procedures accompanied by forms and existential competence	Culture related factors (willingness to engage with other people in social interaction)	Language & Communication Awareness  General Phonetic Awareness & Skills Study skills
Knowledge of the World Sociocultural Knowledge  Intercultural Awareness	Practical Skills  Intercultural Skills	Attitudes Motivations Values Beliefs Cognitive Styles Personality Factors Self-image	Heuristic Skills

The specific- language competences are called upon by the learner when performing language tasks: linguistic, sociolinguistic and pragmatic.

Table 2: Specific Competences

Specific competences		
Linguistic Competence	Sociolinguistic Competence	Pragmatic Competence

*Adapted from Piccardo, Berchoud, Cignatta, Mentz, Pamula, 2011, p. 35*

The communicative language competences involve knowledge, skills, and know-how for each of the following three components:

- **Linguistic Component:** Deals with the knowledge of phonology, morphology, lexicon and syntax.
- **Sociolinguistic Component:** Refers to the sociocultural conditions of language use such as social group repertoires or politeness rules.

- **Pragmatic Component:** Covers, among others, speaker’s and receptor’s attitudes and beliefs, their understanding of the context of an utterance and the functional use of language; for example the use in specific scenarios of how to act in a given social event or how to participate in a job interview.

The following table describes Costa Rican general descriptors according to CEFR English proficiency bands for Third Cycle (II Level) and Diversified Education (III Level):

## **Mediation of Learning**

A shift from communicative to action-oriented language teaching requires the design and implementation of concrete, meaningful and relevant real-life situations for students to demonstrate their English language abilities through tasks. This envisions the English classroom as a social, collaborative, action-oriented linguistic environment. (Perrot, 2010).

Tasks are a key feature in the mediation of learning. Task accomplishment by an individual involves the strategic activation of specific linguistic competences (linguistic, pragmatic and socio-linguistic) along with a range of socio-cognitive competences in order to carry out a set of purposeful actions in a particular domain (interpersonal, transactional, academic and professional) with a clearly defined goal and a specific outcome. Tasks can be extremely varied in nature and may involve language activities, to a greater or lesser extent. For example, creative (painting, story writing), skills based (repairing or assembling something), problem solving (jigsaw, crossword), routine transactions (interpreting a role in a play, taking part in a discussion, giving a presentation, planning a course of action, reading and replying to an e-mail message, etc.). A task may be quite simple or extremely complex (e.g., studying a number of related diagrams, instructions, and assembling an unfamiliar and intricate apparatus). A particular task may involve a greater or lesser number of steps or embedded sub-tasks and consequently the boundaries of any one task may be difficult to define (CEFR, p. 157).

Most of the tasks performed involve some sort of text, and all texts have the purpose of performing (and enabling us to perform) tasks. Examples of texts in everyday life include bus schedules, city maps, bulletin boards, voice messages, and announcements over a personal announcement system. Planning a task provides an opportunity to think about these different types of texts and their linguistic and cultural characteristics. (Piccardo, p.30 2014) Tasks, as with any activity in real life, require reading or speaking as a means of achieving a specific goal other than (or in addition to) a language goal. The CEFR emphasizes the social nature of actions. Tasks sometimes require different levels of co-operation with others (other users or learners). In performing even the most solitary task, a user/learner must consult materials produced by other individuals, and this task will generally have an impact beyond the user/learner performing it.

### **General Mediation Principles for Third Cycle and Diversified Education**

- English teaching places priority on the fine-tuning of learners communicative competence involving oral comprehension and oral and written communication, so that they become independent users of English and can reach level A2+ or B1 based on the descriptors of the CEFR.
- Teachers can select three or four goals per week from the units. They can combine oral or written comprehension with oral and written production, depending on the pedagogical purpose of the lesson.
- Teachers start each theme of a unit's scenario and lesson with a warm-up activity. Then, they share the learning goals, and essential question with the students and the expected outcome for that day or week.
- The enduring understanding is shared by the teacher at the beginning of each unit to connect students with the core ideas that have lasting value beyond the classroom.
- Lessons follow a task-based approach combined with the action-oriented approach.
- Grammar is developed by combining both inductive and deductive instruction within meaningful context.
  
- Teacher makes sure that all learners understand task instructions.
  
- Teachers should ensure learners know how to use strategies through teacher scaffolding and modeling, peer collaboration and individual practice.
  
- Learners have at their disposition useful words, phrases and idioms that they need to perform the task. It could be an audio recording with the instructions and the pronunciation of the words and phrases needed.
  
- The task could involve the integration of listening and speaking or reading and writing and are given to students individually, in pairs, or teams.
  
- The learners complete the task together using all resources they have. They rehearse their presentation, revise their written report, present their spoken reports or publish their written reports.
  
- Teacher monitors the learners' performance and encourages them when necessary.
  
- Preparation time, clarification and wait time is given to the learners to prepare and answer questions when asked.

- The learners consciously assess their language performances (using rubrics, checklist and other technically designed instruments that are provided and explained to them in advance). Teachers assess performance, provide feedback in the form of assistance, bring back useful words and phrases to students 'attention, and provide additional pedagogical resources to students who need more practice.
- At the end of each unit, the learners develop and present integrated mini-projects to demonstrate mastery of the unit goals.
- The enduring understanding and essential question are central to articulate the three learnings: learn to know, learn to do and learn to be and live in community. The integrated mini-project is an opportunity for students to integrate these three learnings in a single task.
- Teach and plan English lessons in English to engage learners socially and cognitively.

The teacher must follow a set of integrated sequence procedures as presented below to develop the different linguistic competences:

- a. **Oral Comprehension:** Planning (pre-listening, motivating, contextualizing, explaining task goal); listening for the first time (general understanding); pair/group feedback; listening for the second time (more detailed understanding); and self/co assessment.
- b. **Written Comprehension:** Planning (pre-reading, explaining task goal, use typographical clues, list difficulties/strategies to cope them); while-reading reading for the first time; pair/group feedback, reading for the second time, post-reading (for reacting to the content or focusing on features /language forms and self /co assessment).
- c. **Oral Production:** Spoken interaction (planning, organizing, rehearsing, and interacting) and spoken production (planning, organizing, rehearsing, and producing).
- d. **Written Production:** Pre-writing, drafting, revising, editing and publishing.

## **Strategies for Teaching the Linguistic Competences**

### **Listening**

Listening is one important language skill and has to be developed in the early stages of language learning. Learners must be prepared to listen, understand, and answer in an appropriate way, which is essential for effective communication. Before each listening activity, teachers give language support by introducing key words to familiarize students with the listening text. Background knowledge on the topic can be used to provide contextualization and potentially better comprehension. Teachers must provide students with opportunities to listen to a variety of texts. At the initial stages, conversations, short messages, free discussions, interviews, and/or role-plays are recommended. Then, in later stages, students are exposed to films, TV shows, reports, interviews, documentaries, current affairs, talk shows, radio news, broadcasts, narratives, lectures, and presentations on academic topics including digital literacy for using information technologies.

### **Active Listening Attitudes in English**

It is important that teachers help students to develop and show an appropriate disposition for dealing with ambiguity when listening and interacting. This will help students to experience meaningful and engaging interaction in any social setting. In order to achieve this, the teacher should combine verbal and nonverbal listening techniques.

### **Nonverbal Cues**

- Use body language to show you are listening.
- Make eye contact with the person with whom you are in dialogue.

### Verbal

- Make affirmations.
- Ask relevant questions or summarize what the person with whom you are in dialogue has been saying.

The approach to this skill in this syllabus implies strategies from discrete listening to global listening. Discrete listening means listening for detail whereas global listening refers to listening for the main idea. Both of them involve different types of listening performances, and they will be shown by level in a rising progression from Preschool to the Diversified Education Cycle.

### Secondary school

There are a variety of listening techniques for developing listening skills and getting listening performances from students. They are intensive, responsive, selective, extensive and interactive listening. Selective listening consists of scanning information from oral long messages. Some examples are listening to radio broadcasts, stories, conversations, and TV advertisements. Tasks include identifying specific details such as names, dates, descriptions. Extensive listening is getting the main idea of a message by using prior knowledge. It includes listening to lectures, documentaries, and movie clips. Some tasks are summarizing and note taking to reconstruct an oral message. Interactive performance is the integration of all the above types of listening. Some tasks are participating in group discussions, debates, and real life interactions. The process of recognizing sounds at this level is almost automatic. However, teachers need to reteach the recognition of sounds if students show difficulty with some of them.

### All Levels

There is a common core for developing listening skills in all the levels, such as:

- a. Listen for the gist. Learners listen for the main idea in a text in order to gain a macro perspective. By using visual cues, learners can convey meaning from different texts.
- b. Listen for details. Students listen and look out for specific pieces of information such as key sounds, words or phrases. The use of what, when, where, why and how questions will guide students.

- c. Listen selectively. Learners will listen purposefully and specifically to parts of a text according to the purpose of the listening and the task. Teachers will guide students in organizing information using organizational strategies (e.g., classifying, comparing) for better mental retention.
- d. Listen to make predictions. Learners will anticipate the intended message. They will listen more purposefully and attentively when they make predictions by using the context of the spoken discourse.

The CEFR descriptors will be used to assess students' listening abilities and provide follow-up to their progress.

### **Reading**

Reading is the interaction between the reader and the text to construct implied or literal meaning. This skill intends to expose students to different types of texts and genres such as fiction, non-fiction, autobiographies, fables and fairytales, academic and non-academic texts by experiencing different reading techniques and developing different reading strategies. As it was defined in the listening section, there are several types of reading techniques that can be used in teaching reading. They include perceptive, selective, interactive, and extensive reading. These techniques can also be used to assess students' performances in reading. Examples of perceptive reading performances include reading aloud, multiple choice, and picture-cued items. Selective reading performances are gap filling, matching tasks, and editing. Interactive reading examples of performances are cloze reading, scanning, and ordering tasks. Finally, extensive reading includes skimming, summarizing, note-taking, outlining, and digital literacy skills.

- ability to hear and manipulate the sounds of the language through the development of phonemic awareness,
- ability to apply knowledge of letter-sound correspondence to identify words, for example, decoding through phonics.

### **Secondary school**

At this level, learners will continue to develop and refine their reading comprehension strategies such as anticipation, scanning, skimming, predicting, reading between the lines, making inferences, summarizing, and evaluating. These include decoding words and phrases in long and short texts, applying critical thinking skills, using content and cultural

information to interpret texts and respond critically.

### All Levels

There is a common method for developing reading skills at all the levels. These are:

- a. Activating schemata for the interpretation of texts
- b. Identifying general ideas
- c. Finding specific information
- d. Finding links and connections between events

### Speaking

Speaking is divided into two areas: spoken interaction and spoken production; both of them describe specific language users' roles. In the first one, the language user functions as a speaker and as a listener. There is participation of one or more interlocutors. Different socio-cognitive and collaborative strategies are constantly employed during interaction.

Some examples of interactive activities include:

- transactions,
- casual conversation,
- informal discussion,
- formal discussion,
- debates and interviews.

The second one describes the production of an oral text received by an audience of one or more listeners. Some examples of activities can be:

- public address (information, instructions, etc.),
- addressing audiences (speeches at public meetings, university lectures, sermons, entertainment, sports commentaries, sales presentations, etc.).

They may involve reading a

- written text aloud;
- speaking from notes,
- acting out a rehearsed role;
- speaking spontaneously and singing.

### **Secondary school**

Learners will keep developing their oral English proficiency as they progress through high school. Oral performances include participating in personal exchanges, role-plays, interviews, talk shows, debates, oral presentations and impromptu speeches.

### **All levels**

The teaching of speaking at all levels aims at the practice and production of speech that is fluent and phrasal, not limited to isolated words. The learner has to be taught survival language and fillers to negotiate and get meaning across in and out of the classroom (for example, “excuse me”, “What did you say?” “How do you say...?” “Well...”, “you know...”, “I mean”). Learners have to perform real life tasks that can be used in real exchanges out of the classroom setting. Therefore, more of the speaking tasks must have an interactive and spontaneous outcome. Learners should be taught words, phrases, idioms and colloquial language. Phonemic awareness along with phonological awareness will be developed progressively so that learners get the stress, rhythm and intonation of natural English speech. (Brown, 2001). Finally, the quality and quantity of learners’ exposure to English as well as their use of English is fundamental. As the saying goes, “practice makes perfect”.

### **Writing**

Writing is the skill that emphasizes through graphic symbols the formal expression of thought. Students need to know how to write different types of texts. When asking learners to write, it is important to consider their age, interests, and proficiency level. It is important to get students to write a wide variety of texts. Writing as a process includes the following

steps:

- **Brainstorming**
- **Organization of information through graphic organizers and outlines**
- **Drafting and revision**
- **Editing and final copy**

To get students to become proficient writers, provide first a model to follow. Dictation is one example. It could be a word, a phrase, or a sentence. This is known as copying. After copying, learners will do writing exercises to refine grammar and mechanics. Then they move into guided-writing where they follow a given pattern for expressing personal thoughts and ideas. Next, learners are ready to do free writing. At this stage, learners have already acquired the necessary skills to write their own sentences, paragraphs, stories, biographies or essays.

### **Secondary school**

Writing is closely connected to reading. By being exposed to different types of texts, learners get insights about how to write. It is expected that at this level, learners are completely literate in their native language and have started developing the writing process in Spanish at school. Therefore, it is easier for them to transfer some of their literacy skills into the target language and even refine their writing skills in English. Some basic principles to take into account are the following. Writing has four basic stages pre-writing, drafting, revising, and editing. To make writing attractive to learners, it is important to provide authentic writing tasks like responding to an e-mail or digital message to a friend.

### **All levels**

A balance must be kept between the perspective of teaching writing as a process and as a product. Initiate first with phonemic awareness development. Spend a lot of time in pre-writing work and provide a lot of modeling, drilling, writing exercises and then guided writing activities. Make sure that the writing activities emerge naturally from previous reading,

listening or oral work. Praise learners for their writing products. Display the writing productions of students and keep them in a writing portfolio. Create rubrics for self-assessment, peer assessment and teacher's assessment of students' writing.

The CEFR descriptors will be used to assess students' writing abilities and provide follow-up to their progress.

### **Assessment**

Evaluation and assessment are different. Brindley (Brindley, 1989) defines evaluation as “broader in scope, and concerned with the overall program” (qtd. In Coombe, Folse & Hubley, p15). On the other hand, assessment refers to all the strategies used to collect information on a learner's knowledge, skills, and abilities, usually at the classroom level. Assessment practices go beyond what has traditionally been performed in the English classroom, which has been focused mainly on measuring the mastery of language contents, in detriment of language skills and communicative competence. Assessment is a purposeful, continuous, contextualized, authentic, reflective, investigative, systematic and multiphase process, which responds to these four fundamental questions: **Why assessing learning? What to assess? How to assess it? Which are the pedagogical implications?**

The answer to the first question deals with understanding that each learner is different, has particular needs, strengths and weaknesses. The purpose of assessment is to serve each learner's learning and growth. To prevent student's failure and allow timely intervention, assessment allows teachers to detect learning gaps, so that learners can receive the support needed to be successful. The “what” of assessment involves having clarity about the knowledge, skills, abilities, and attitudes (learn to know, learn to do, learn to be and live in community) that learners have to develop as established in the curriculum goals or “can do performance descriptors”. This implies that assessment will mainly be performance-based. Learners are required to demonstrate through integrated-skills tasks within a domain, scenario, and theme, specified knowledge, skills and abilities using the target language. Assessment can also be a discrete point, which means the use of selected response tasks to isolate and measure discrete units of grammatical knowledge, which encompasses

grammatical, semantic and pragmatic knowledge - form, meaning and use (Purpura, 2014, p. 9). Assessment will also be authentic which means that the assessment task will simulate real-life situations within domains and scenarios beyond the classroom setting, and the socio-cognitive, socio-affective, Sociocultural and linguistic demands upon the learner will be similar to the one of a speaker in a target language setting.

Classroom assessment mirrors the learning goals, content of instruction and instructional practices, therefore, curriculum, teaching, and assessment must be coherent for learning goals to be achieved and learners' communicative competence to be developed. This is true for large-scale testing as well. Classroom assessment should also enable learners to demonstrate their learning in multiple ways, from multiple angles, thus serving as learning experiences themselves. Classroom assessment should also promote students' reflection and the use of an array of learning strategies and resources (Teachers of English to Speakers of Other Languages, 2001, p. 8).

Planning lessons carefully, therefore, is of paramount importance. The “how” of assessment is related to the techniques and instruments teachers design to collect accurate data on students' performances. The teaching and learning approach that is promoted in the curriculum is mainly Action-Oriented or performance-based. This means that tasks are designed as prompts to elicit linguistic performances using various socio-cognitive, Sociocultural, and affective resources from learners. Task design, task performance, and assessment become a fundamental unit of instructed learning; tools such as analytic and/or holistic scales, rubrics, progress indicators and checklists play an important role for obtaining valid and reliable qualitative and quantitative data about students' learning and performance.

### **General Principles for Assessing Language Competences**

Performance-based assessment is based on three cornerstones: diagnostic, formative and summative assessment. Each of them play an important role in the English classroom.

**Diagnostic assessment** is intended to improve information to stakeholders to improve the learner's experience and their level of achievement. It looks backwards rather than forwards. It assesses what the learner already knows and/or the

nature of difficulties that the learner might have, which, if undiagnosed, might limit their engagement in new learning. It identifies the starting line to develop the competence. It also identifies students' needs and areas of intervention.

**Formative assessment** is used to monitor student learning. It helps to identify students' strengths and weaknesses and target areas that need work and to recognize where students are struggling and address problems immediately. It can be used by instructors to improve their teaching and improve students' learning. It also evaluates students in the process of “forming” their competences and skills with the goal of helping them to continue that growth process. In short, it focuses on the process to develop competence by using information from the analysis of weaknesses and strengths in portfolios, assignments, or different products.

**Summative assessment** is centered in the strategies implemented to develop competence. It evaluates student learning at the end of an instructional unit by comparing it against a standard or benchmark. The information provided by this type of assessment can be used formatively to guide their efforts and activities in subsequent courses.

When assessing by competences, it is necessary to focus on:

1. Selecting the goal(s) or can do statements and linguistic skills.
2. Determining the type of task the learner has to perform in real-life within the theme and scenario of the unit, e.g., introducing someone, greeting someone, giving personal information.
3. Selecting a task that will allow the learner to demonstrate what they can do.
4. Selecting the indicators and performance levels (criteria) that will be used to assess the performance of the learner during the task.
5. Informing in advance and discussing with students the criteria that will be used to assess the task so they know what is expected and can assess their own performance as well.

To cope with the approaches used in the design of this syllabus, the assessing techniques should reflect the dynamic classroom procedures and should promote critical thinking among the students in any learning task they perform such as: information-gap, opinion-gap, problem-solving, games and critical cultural incidents which help the learners appreciate their own culture and the culture of the target language. The components of assessment and their weight are in line with

<b>Template Elements</b>	
<b>Level</b>	Grade level of the unit
<b>Unit</b>	1 of 6
<b>Scenario</b>	A real-life situation providing authenticity of situations, tasks, activities, texts
<b>Themes</b>	The focus of attention for communicative acts
<b>Enduring Understanding</b>	Big ideas that give importance and meaning to a set of curriculum expectations and have a lasting value for learners, beyond the classroom.
<b>Essential Question</b>	A question, which fosters understanding and critical thinking for students to transfer their learnings to new context.
<b>Linguistic Competence</b>	The knowledge, skills and abilities which are called upon when performing language acts
<b>Goals</b>	Can-do performance descriptors
<b>Oral and Written Comprehension</b>	What a learner can understand or is able to do when listening and/or reading
<b>Oral and Written Production</b>	What a learner can produce in an oral and/or written way
<b>Learn to know</b>	Linguistic competence: lexical, phonological, and syntactical knowledge
<b>Grammar &amp; Sentence Frame</b>	The grammatical components that will be the focus of the unit (with examples)
<b>Phonemic Awareness/ Phonology</b>	Learners ability to hear, identify, and manipulate sounds in spoken words or sentences to progressively decode and interpret texts
<b>Vocabulary</b>	Words learners need to know to communicate effectively within a domain, scenario, and theme
<b>Learn to do</b>	Pragmatic competence: the functional use of linguistic resources – functions and discourse markers
<b>Function</b>	The use of spoken discourse and/or written texts (acts of speech)
<b>Discourse Marker</b>	Linking words or phrase that connect one piece of discourse with another one (e.g., and, because)
<b>Learn to be and Live in Community</b>	Socio-linguistic competence: rules of politeness and norms governing social groups
<b>Psycho-social</b>	Attitudes, motivations, values, beliefs, cognitive styles, and personality factors
<b>Sociocultural</b>	Politeness conventions, expressions of folk wisdoms, register differences, dialects and accents
<b>Suggested Mediation Strategies</b>	Organized, purposeful and scaffolded learning experiences
<b>Assessment Strategies</b>	Required evidence of student’s learning

Unit 1		
<b>Scenario:</b> Love What We Do!	<b>Themes:</b> <ol style="list-style-type: none"> <li>1. Help wanted</li> <li>2. Jobs</li> <li>3. Interviewing</li> <li>4. Working to Live or Living to Work?</li> </ol>	
<b>Enduring Understanding:</b> The different jobs and occupations make communities function well in society.		
<b>Essential Question:</b> In what ways do people's jobs or occupations contribute to our community and life in society?		
Linguistic Competencies	Goals	
<b>Oral and Written Comprehension</b>	 Listening	<p><b>L1.</b> understand the main points, concepts, key points and details in television programs, radio, and web-based broadcasts/announcements dealing with subjects of interest if the people talk slowly and clearly.</p> <p><b>L2.</b> follow a small group discussion between two or more native speakers if that conversation is unhurried and if the learner is familiar with the topic under discussion in a video/audio recording about jobs and occupations.</p> <p><b>L3.</b> understand when people speak at normal speed on familiar topics. There may be a need to repeat particular words and phrases or help in clarifying particular details.</p>
	 Reading	<p><b>R1.</b> understand factual text and simple reports on familiar topics (e.g., news accounts, blog posts, Twitter feeds) about jobs and occupations.</p> <p><b>R2.</b> understand charts and graphs.</p> <p><b>R3.</b> manipulate English language sounds using knowledge in phonics, syllabification and word parts.</p> <p><b>R4.</b> understand textbook or online explanations and examples with aid of word list and/or dictionary, key words, diagrams, and illustrations to support reading comprehension.</p>

<b>Oral and Written Production</b>	 Spoken Interaction	<p><b>SI1.</b> summarize what has been said and convey this information to another about job and occupation ads in dialogues and interviews.</p> <p><b>SI2.</b> explain what he/she means with another word when he/she can't think of the exact word.</p> <p><b>SI3.</b> ask someone for clarification of what others have just said or for confirmation in order to correct some basic mistakes.</p> <p><b>SI4.</b> manage conversations and interviews about personal experiences, feelings, opinions and reactions on a job or occupations, justifying main points of view, assumptions and plans, briefly.</p>
	 Spoken Production	<p><b>SP1.</b> retell a simple story read/heard in class about a job fair or job experience.</p> <p><b>SP2.</b> describe in detail personal job experiences and information about job fair supported by online/physical information.</p>
	 Writing	<p><b>W1.</b> write a resume for requesting a job, based on ads (newspaper, internet, radio).</p> <p><b>W2.</b> write a cover letter for a dream job or occupation, using simple, coherent, and well-written sentences and check written resume or cover letter to look for mistakes (subject-verb agreement, pronoun and article agreement, capitalization, using commas, sentence sense, word order, text structure, concrete ideas, etc.).</p>

<b>Enduring Understanding:</b> Everything from tweets, memes, poems, posts, blogs, comics, short stories, videos and more reveal truths and beliefs about the writers and their culture.		
<b>Essential Question:</b> What do the stories we share say about us?		
<b>Linguistic Competencies</b>	<b>Goals</b>	
	<b>Learner can...</b>	
<b>Oral and Written Comprehension</b>	 Listening	<p><b>L1.</b> understand the main points of a relatively long discussion on a familiar topic, related to stories in Standard English.</p> <p><b>L2.</b> understand specific details from many web-based broadcasts/ memes, comics, posts, poems dealing with subjects of interest if the people talk clearly.</p>
	 Reading	<p><b>R1.</b> understand specific factual text and simple reports on familiar topics (e.g., movie reviews, interviews, tweets, posts, etc.).</p> <p><b>R2.</b> recognize English language sounds using knowledge in phonics, syllabification and word parts.</p> <p><b>R3.</b> understand texts of various lengths, as long as the words used are familiar and/or concern areas of learners' interest (e.g., tweets, memes, poems, posts, blogs, comics, short stories, videos) supported by the use key of words, diagrams, and illustrations.</p>

<b>Oral and Written Production</b>	 Spoken Interaction	<p><b>SI1.</b> repeat what has been said and convey this information to another person.</p> <p><b>SI.2.</b> talk in detail about tweets, memes, poems, posts, blogs, comics, short stories, videos.</p>
	 Spoken Production	<p><b>SP1.</b> describe what is occurring in tweets, blogs, short stories, videos, including his/her personal opinion about them.</p> <p><b>SP2.</b> sustain a conversational exchange with a peer in the classroom when the topic is familiar, though there may be some difficulty in understanding and being understood from time to time.</p> <p><b>SP3.</b> express opinions of a short story, play, essay, or poem examined in class.</p>
	 Writing	<p><b>W1.</b> express what has been learned, how it has been learned, and learning goals for the future.</p> <p><b>W2.</b> summarize simple text dealing with familiar subjects (e.g., short stories, videos, blogs) and check written sentences to look for mistakes (subject-verb agreement, pronoun and article agreement, capitalization, indentation, commas, appropriate vocabulary and connecting ideas and required format) spelling and basic punctuation accurately enough to be followed most of the time.</p>

Unit 1	
<p><b>Scenario:</b> Caution: Fragile World. Handle with Care</p>	<p><b>Themes:</b></p> <ol style="list-style-type: none"> <li>1. What Makes Something Sustainable</li> <li>2. Products and Practices around the World.</li> <li>3. Products and Practices in Costa Rica</li> <li>4. Am I Environmentally friendly?</li> </ol>
<p><b>Enduring Understanding:</b> Sustainable development is a “glocal” (global and local) issue where all citizens share a common sustainable responsibility to preserve the planet for future generations.</p>	
<p><b>Essential Question:</b> Why is it important to focus on sustainable development?</p>	
Linguistic Competencies	Goals
<p><b>Oral and Written Comprehension</b></p>	<p style="text-align: center;"> Listening</p> <p><b>Learner can...</b></p> <p><b>L.1.</b> understand the main points of even a relatively long discussion if it concerns a familiar topic and if the people involved use Standard English and do not speak too quickly.</p> <p><b>L.2.</b> follow the main idea of audio text about our sustainable world.</p> <p><b>L.3.</b> understand the most important information in a news broadcast (television, Internet) when visuals support the message about the fragile world and the way of mitigating effects responsibly.</p>
	<p style="text-align: center;"> Reading</p> <p><b>R.1.</b> use key words, diagrams, and illustrations to support reading comprehension</p> <p><b>R.2.</b> manipulate English language sounds using knowledge in phonics, syllabification and word parts.</p> <p><b>R.3.</b> understand the important information in simple, clearly drafted printed materials such as newspapers, charts and graphs with some understanding of sustainable development.</p>

<b>Oral and Written Production</b>	 Spoken Interaction	<p><b>SI. 1.</b> verbally indicate willingness to participate in activities.</p> <p><b>SI. 2.</b> sustain a conversational exchange with a peer in the classroom when the topic is familiar, though there may be some difficulty in understanding and being understood from time to time.</p>
	 Spoken Production	<p><b>SP.1.</b> express opinions about the fragile world and the way of mitigating effects responsibly, welcoming questions with others' opinions.</p> <p><b>SP.2.</b> explain and justify points of view briefly about the topic.</p>
	 Writing	<p><b>W.1.</b> summarize simple text dealing with the subject.</p> <p><b>W.2.</b> describe events (e.g., sustainable practices at home or school) using complete sentences that are connected to each other in expository paragraphs and check written paragraphs to look for mistakes (subject-verb agreement, pronoun and article agreement, capitalization, using commas, sentence sense, word order, text structure, concrete ideas, etc.).</p>

<b>Scenario: #HighTech HighTouch</b>	<b>Themes:</b> <ol style="list-style-type: none"> <li>1. Hot Apps</li> <li>2. Danger Zones in a Digital World</li> <li>3. Tech Tools for Positive Change</li> <li>4. My Future is in My Hands</li> </ol>	
<b>Enduring understanding:</b> Technology is a powerful tool and, in the right hands, it can make the world a better or worse place.		
<b>Essential Question:</b> How can technology help me make my world better?		
<b>Linguistic Competencies</b>	<b>Goals</b>	
<b>Oral and Written Comprehension</b>	 Listening	<b>L.1.</b> understand many television, radio, and web-based broadcasts/ announcements dealing with subjects of interest if the people talk clearly.  <b>L.2.</b> understand when people speak at normal speed on familiar topics. There may be a need to repeat particular words and phrases.  <b>L.3.</b> follow the main idea of audio text if the topic is familiar and the text can be replayed.
	 Reading	<b>R.1.</b> understand factual text and simple reports on familiar topics (e.g., movie review, interviews, and meeting agendas).  <b>R.2</b> identify and manipulate English language sounds using knowledge in phonics, syllabification and word parts.  <b>R.3.</b> understand clear, simple instructions with some visual support (e.g., how to use an app).
<b>Oral and Written Production</b>	 Spoken Interaction	<b>SI.1.</b> ask questions about procedures.  <b>SI.2.</b> start, sustain and close a conversational exchange with a peer in the classroom when the topic is familiar, though there may be some difficulty in understanding and being understood from time to time.

	 <p>Spoken Production</p>	<p><b>SP.1.</b> express opinions on familiar subjects and ask for others' opinions.</p> <p><b>SP.2.</b> explain and justify points of view, briefly, about the digital world.</p>
	 <p>Writing</p>	<p><b>W.1.</b> summarize simple text dealing with familiar subjects.</p> <p><b>W.2.</b> describe applications or tech tools (e.g., apps, video games, programs, tech tools) using complete sentences that are connected to each other and check written paragraphs for mistakes (subject-verb agreement, pronoun and article agreement, capitalization, using commas, sentence sense, word order, text structure, concrete ideas, etc.).</p>

<b>Enduring Understanding:</b> Every day people are faced with choices - some big, some small - and the way people react to those choices shape their future.		
<b>Essential Question:</b> How do decisions we make today change our lives tomorrow?		
Linguistic Competencies		Goals
Oral and Written Comprehension	 Listening	<b>L.1.</b> understand when people speak at normal speed on familiar topics. There may be a need to repeat particular words and phrases.  <b>L.2.</b> follow the main idea of audio text if the topic is familiar and the text can be replayed.
	 Reading	<b>R.1.</b> understand factual text and simple reports on familiar topics (e.g., interviews).  <b>R.2.</b> manipulate English language sounds using knowledge in phonics, syllabification and word parts.  <b>R.3.</b> use key words, diagrams, and illustrations to support reading comprehension.  <b>R.4.</b> understand texts of various lengths as long as the words used are familiar and/or concern areas of student interest.
	 Spoken Interaction	<b>SI.1.</b> interview others if the questions have been prepared beforehand. Sometimes, can pose a further question without having to pause very long to formulate the question.  <b>SI.2.</b> sustain a conversational exchange with a peer in the classroom when the topic is familiar, though there may be some difficulty in understanding and being understood from time to time.
Oral and Written Production		<b>SP.1.</b> describe personal goals and intentions.  <b>SP.2.</b> express and ask for others' opinions and needs on familiar subjects.

	 <p>Spoken Production</p>	<b>SP.3.</b> explain and justify points of view, assumptions, and future plans, briefly.
	 <p>Writing</p>	<b>W.1.</b> summarize simple text dealing with familiar subjects.  <b>W.2.</b> write a report on an important personal experience (e.g., graduating from school, getting interviewed, and choosing a career) and check written summaries and reports to look for mistakes (subject-verb agreement, pronoun and article agreement, capitalization, using commas, sentence sense, word order, text structure, concrete ideas).

<b>Scenario:</b> Get Ready. Get set. Go!		<b>Themes:</b> 1. Get ready: Take a Look at your Dreams and Fears 2. Get Set: College or Career? 3. Surviving or Thriving? 4. Go! The Future is Now
<b>Enduring Understanding:</b> Decisions can have positive and negative consequences in the future.		
<b>Essential Question:</b> How can decisions define my future?		
<b>Linguistic Competencies</b>		<b>Goals</b>
		Learner can...
<b>Oral and Written Comprehension</b>	 Listening	<b>L.1.</b> understand the main point and the important details of audio recordings, provided standard language is used and the topic is one of interest. <b>L.2.</b> understand the main points in a relatively long conversation that is overheard.
	 Reading	<b>R.1.</b> read short media reports on familiar events. <b>R.2.</b> distinguish between different text purposes (to inform, to argue a point, etc.). <b>R.3.</b> understand most words in narrative and expository text, and extract the key ideas from those texts.
<b>Oral and Written Production</b>	 Spoken Interaction	<b>SI.1.</b> speak in a comprehensible and fairly fluent manner using a large number of different words and expressions, though there may be pauses for self-correction. <b>SI.2.</b> participate in-group work, expressing opinions and making suggestions actively.

	 <p>Spoken Production</p>	<p><b>SP.1.</b> express an opinion on different topics associated with everyday life and common issues (e.g., give a short talk on the value of developing soft skills).</p> <p><b>SP.2.</b> present an argument clearly enough to be understood most of the time.</p>
	 <p>Writing</p>	<p><b>W.1.</b> list the advantages and disadvantages of things that are of personal concern (e.g., future goals, universities, majors, soft skills, careers, events).</p> <p><b>W.2.</b> write a descriptive paragraph about universities, majors or soft skills and check written paragraphs or lists to look for mistakes (subject-verb agreement, pronoun and article agreement, capitalization, using commas, sentence sense, word order, text structure, concrete ideas, cohesion, etc.).</p>
