Forward letter to the teachers

Dear Teacher,

This module focuses on supporting you as facilitators as you help your colleagues in the process of understanding and implementing the new English syllabus. Thank you for your commitment to the goal of transforming English Classrooms across Costa Rica through Action-Oriented Teaching and Learning.

This document contains a range of resources and key elements to assist you in collaborative environments as you make your way through the four following stages (proposed by Patrick Moran, a respected authority in language teacher education):

- * Knowing about--by understanding the concepts and principles of the curricular English teaching and learning reform.
- * Knowing why--by internalizing the purpose of the English reform as a response to contributing to the formation of the new citizen the country requires.
- * Knowing how--by developing and implementing the action-oriented learning tasks when designing lesson plans, assessment instruments and follow up actions to best serve learners.
- * Knowing oneself--by reflecting upon and reviewing your personal beliefs and teaching practices.

In conjunction with the materials in this module, we are encouraging you to build partnerships with other colleagues and to contextualize the material and ideas given according to your students' needs and context.

Furthermore, we invite you to develop your knowledge and skills as lifelong learners to improve mediation practices and to build confidence and motivation to teach. To assist you with this ongoing process, we will continue to develop and provide online digital resources and professional development opportunities.

Best,

Marianella and Alfredo

Summary of the Syllabus Theoretical Framework

Introduction: Why a new English Curriculum?

1. Learners need an updated curriculum that reflects the knowledge, skills, and abilities needed to succeed in the information age as 21st century learners.
2. Pre-school, elementary, and secondary school's curriculum required an update in order to have more pertinent target content.
3. Learners who receive English lessons in elementary and high schools are not reaching the expected English proficiency levels after eleven or twelve years of instruction.
4. Citizens need to possess a number of competences to communicate effectively in the global context and to face the challenges of an interconnected world.

Purpura (2016) summarized these competences as follows:

Over the years, the geopolitical and technological forces in the workplace have increased the knowledge, skills, and abilities (KSAs) that people need to perform their jobs. We are now asked to read, listen, and synthesize large amounts of information from several sources via multiple modalities; search for information, judge its accuracy, and evaluate its applicability; and use communication technologies to collaborate in teams whose members represent a diverse global community (National Research Council, 1999, 2001). Importantly, many of us are asked to do this in a second, foreign, or heritage language (L2), requiring competencies for communicating ideas and establishing relationships in culturally respectful ways (p. 190).

In addition, he stated that:

To succeed in this environment, L2 users must demonstrate that they have the skills needed to process information, reason from evidence, make decisions, solve problems, self-regulate, collaborate, and learn – and they need to do this in their L2 (p. 190).

Education for a new citizenship reinforces the need of 21st century learners who integrate proactively in a globalized world while strengthening their national and global identity.

The Learner as a New Citizen

Education for a new citizenship envisions learners as active agents of change able to:

- Use knowledge, skills, and abilities beyond school contexts.
- Express their own points of view.
- Practice peaceful conflict resolution and search for democratic solutions.
- Harmonize social and economic development and environmental sustainability.
- Take action in favor of sustainability of local, national, and global resources.
- Be aware of a global world where national borders have become more diffused.
- Use ICTs and access to knowledge networks as tools for communication, innovation, and proactive social service.
- Be compassionate national and global citizens.
- Practice democratic principles such as freedom of expression and religion, respect for plurality and cultural diversity (sexual, linguistic, and ethnic) as stated in the Costa Rican Constitution.
- Defend and protect Human Rights and be against all forms of discrimination.

Figure 2. Dimension for Educating for a New Citizenship

What are the legal underpinnings and how are they related to language teaching and learning?

Policy for the 21th Century highlights three philosophical trends:

	Rationalism	Humanism	Constructivism
Understanding	Development of complex, challenging, creative and critical thinking skills,	Full realization of the human being, as a person with rights and responsibilities.	Construction and reconstruction of understandings and learnings
Implications for teaching	Cooperative learning and pedagogical scaffolding	Sensitivity to and awareness of learning styles and affective variables	Problem solving, inductive and deductive teaching, and experiential learning

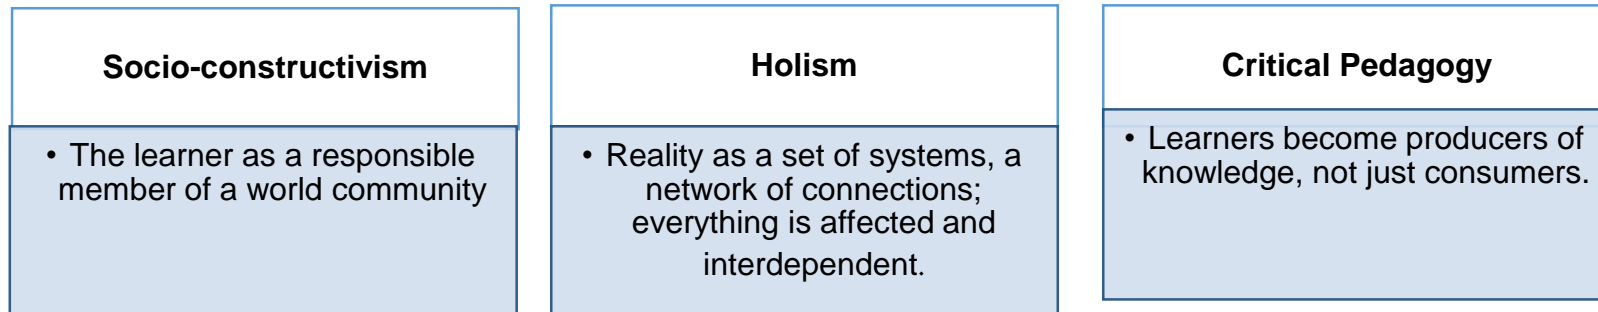

The policy “*The School as the Core of the Quality of Costa Rican Education*” recognizes three dimensions of learning:

Language Learning Considerations

Considerations	Understanding	Implications for Language Learning
Philosophical	It focuses on the learner as a social agent who is active, independent, critical, reflective, creative, innovative, inquisitive, and respectful of human rights.	Learning environments and experiences should promote dialogue and creative responses to solve real-life problems.
Psychological	It seeks the whole development of the person and is associated with the person’s affective dispositions.	Pedagogic mediation is flexible, inclusive, and culturally relevant, respecting the individual differences of each student in the classroom.
Neurological	It is related to the brain’s architecture and how maturational processes influence language development.	Underscores the importance of starting the learning of foreign languages early in life and in scaffolding the L1 to help L2 acquisition.
Socio-cognitive	It is related to the brain’s architecture (attention, short-term long-term working memory) and how it functions to process information (metacognition) related to learning and communication.	Connects to the complexity and the cognitive load of tasks presented to students.
Socio-cultural	It includes the elements of diversity, interdependence, and interconnection with among others.	Addresses learning new behaviors, values, and social skills in line with a human rights approach and through democratic participation.

Which pedagogical trends influence the teaching practices?

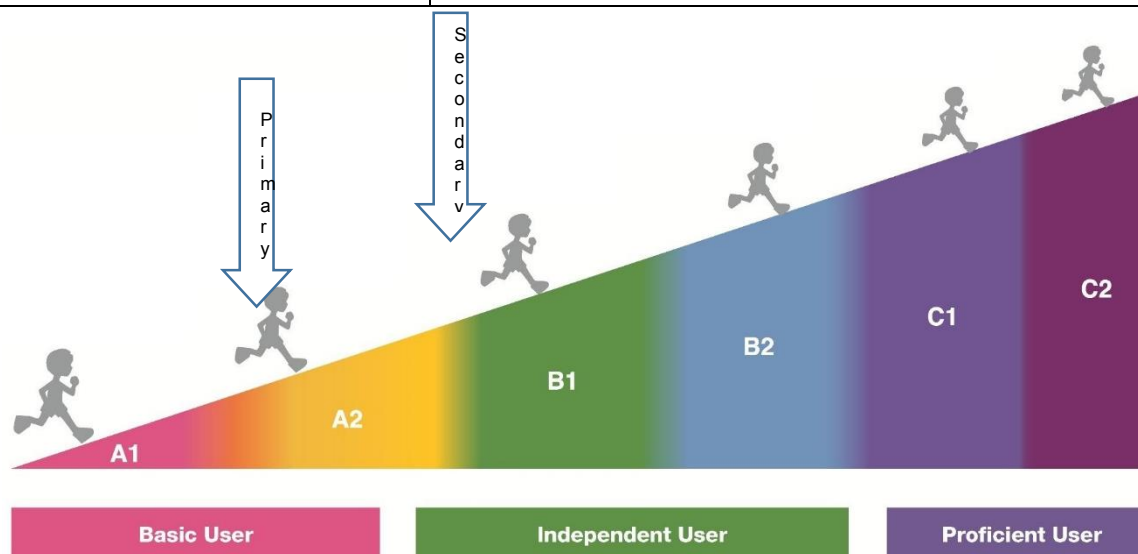

The Common European Framework of Reference (CEFR)

CEFR describes proficiency levels based on accumulated evidence gathered over time from learner activities, tasks, or projects.

Implications:

- Standard Terminology
- Track student progress
- Descriptors – teaching, learning, and assessment
- Students monitor and take responsibility
- Transferability across settings
- Parent communication

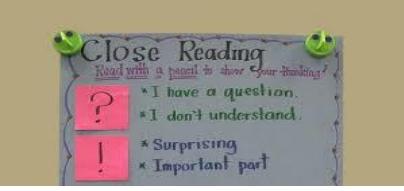

Costa Rican general descriptors according to CEFR English proficiency bands

The Action-Oriented Approach

<p>Learner</p> 	<ul style="list-style-type: none"> • An agent/performer with intercultural awareness skills. • Autonomous, works cooperatively, interacts with others, investigates and solves problems using the tools at his/her disposal (general and specific competences). • Develops metacognitive, reflective and critical thinking strategies for successful completion of the task.

<p>Learning Resources</p> 	<ul style="list-style-type: none"> • Oral or written authentic texts: business cards, bus tickets, newspaper articles, book excerpts, wikis, bus schedules, city maps, bulletin boards, voice messages, and announcements. • Appropriate to the learner's needs and competence level. • Intercultural perspective
<p>Aims of communicative activities/tasks</p> 	<ul style="list-style-type: none"> • Communicative activities become actions that the learner/social agent performs in order to build up general competences and communicative language competences. • The goal is successful action and accomplishment of tasks in a particular scenario and domain aligned to the learner's life experience and personality.
<p>Learning Environment</p> 	<ul style="list-style-type: none"> • Real-world contexts (personal, public, educational and vocational domain) collaborative, stimulating, mediated by ICTs.
<p>Assessment</p> 	<ul style="list-style-type: none"> • Assessment is based on what the social agent is able to do in real-life situations or scenarios and the process he/she requires to develop the competences. Authentic assessment is favored. • The acquisition and refinement of general and communicative competences is a continuous process, both at school and in the world beyond the school.

Basic Principles of the Action-Oriented Approach

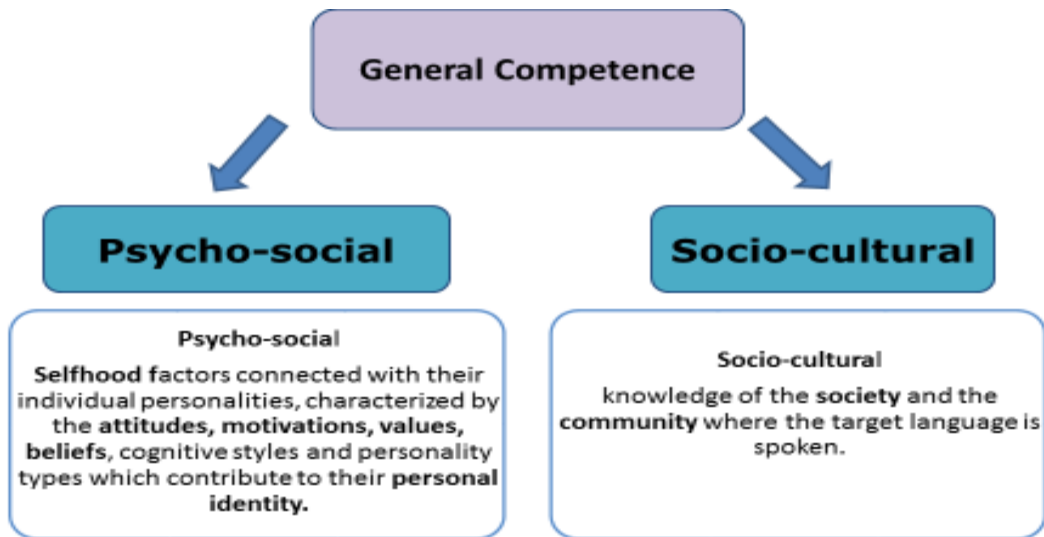

1. The students are social agents that use the target language to perform specific actions in real life contexts meaningfully.
2. Language performances, in oral or written form, respond to language functions and are carried out in specific scenarios.
3. Enabling and communicative activities are task-based and real-life.
4. Learners use authentic materials ensuring comprehensible input, as much as possible.
5. The ICT becomes an important tool to create meaningful learning experiences.
6. A great degree of autonomy is placed on the learner; therefore, the teacher works in the development of learners' meta-cognitive, meta-affective, and meta-social strategies.
7. Intercultural awareness plays an important role for getting meaning across and facilitating communication among cultures.
8. Vocabulary, syntax, cohesive forms, and phonology are taught with the purpose of facilitating communication

General competences

Consist of knowledge, skills, and abilities to learn existential competences that are not language-specific but learners need to know when performing different actions included in language activities.

Competence

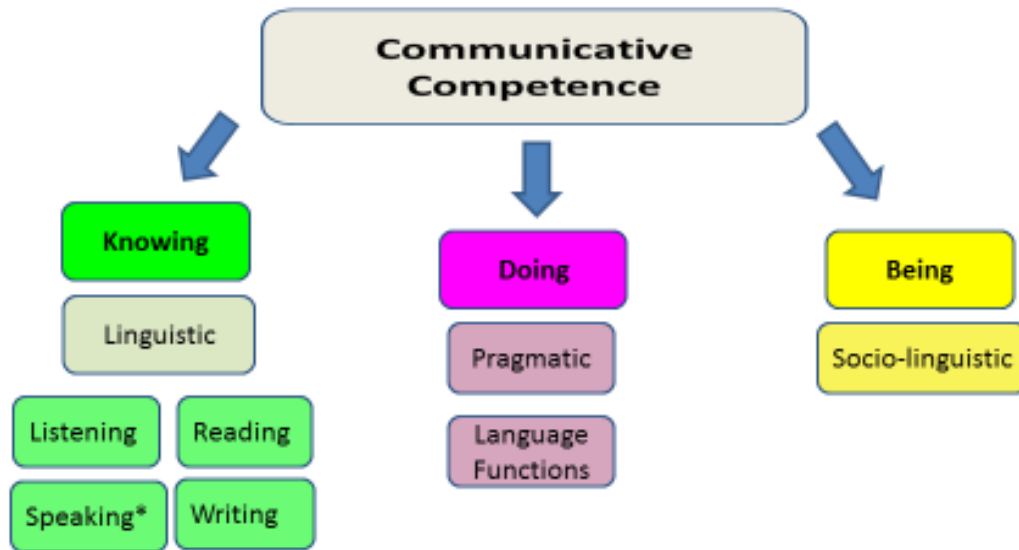

The CEFR defines competences as “the sum of knowledge, skills and characteristics that allow a person to perform actions in society.”

Communicative competence

The communicative language competences involve knowledge, skills, and understanding of each of the following three components:

- **Linguistic Component:** Deals with the knowledge of phonology, morphology, lexicon and syntax.
- **Sociolinguistic Component:** Refers to the socio-cultural conditions of language use such as social group repertoires or politeness rules.
- **Pragmatic Component:** Covers, among others, speaker's and receptor's attitudes and beliefs, their understanding of the context of an utterance and the functional use of language; for example, the use in specific scenarios of how to act in a given social event or how to participate in a job interview.

Communication

The CEFR defines communication as a social act, where learners are social agents, developing a range of general and specific communicative language competences, moving from learning about the language to learning to communicate in the language in active, spontaneous, and authentic language interaction.

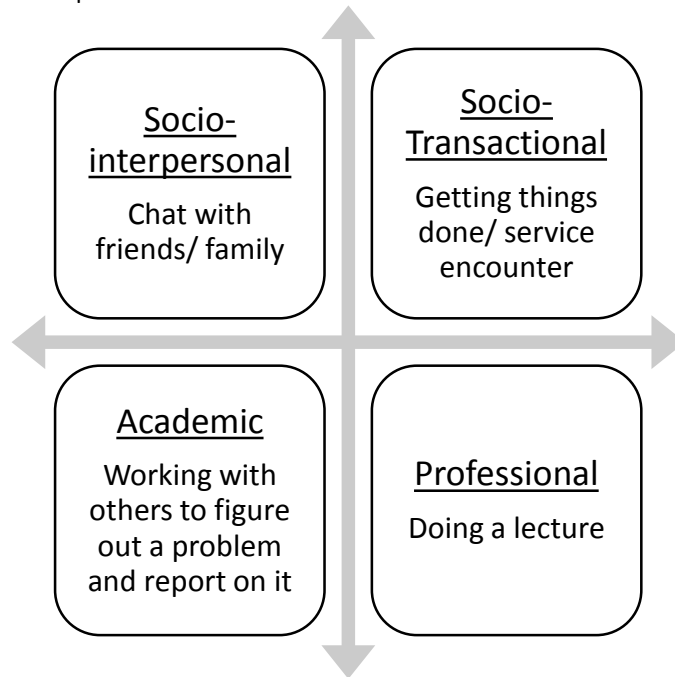

Tasks

Tasks are defined as any purposeful action considered by an individual, necessary to achieve a given result in the context of a problem to be solved, an obligation to fulfill, or an objective to be achieved. This product may be a brochure for tourists, a blog entry, or a fundraising project for a humanitarian cause.

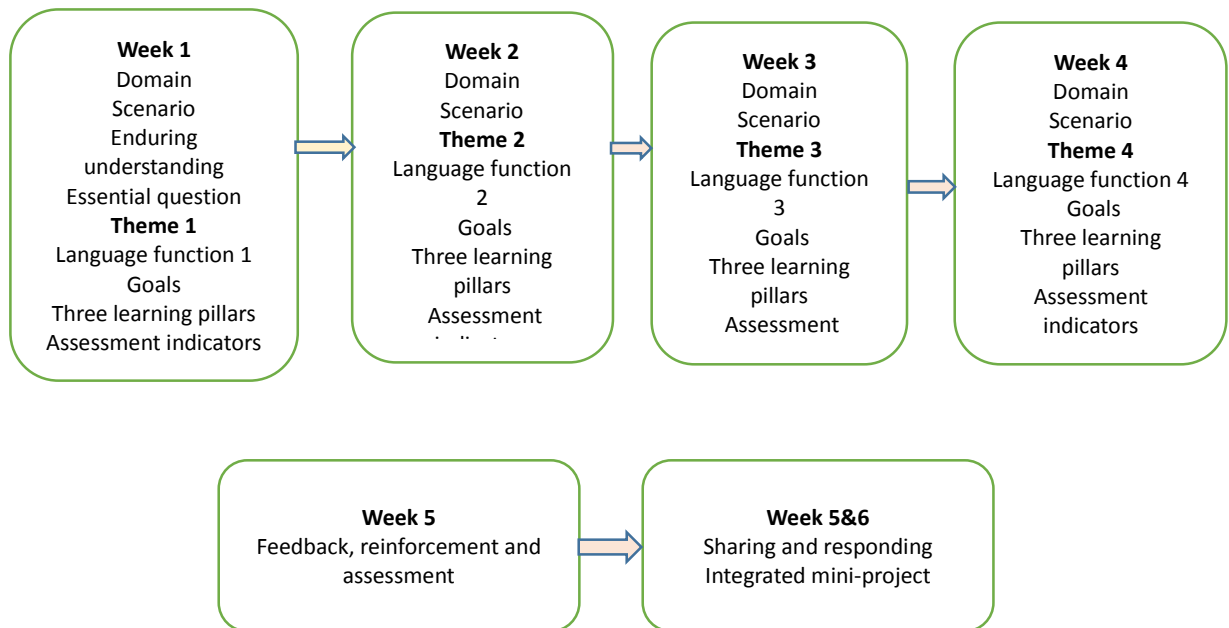

Task accomplishment by an individual involves the strategic activation of specific linguistic competences (linguistic, pragmatic and socio-linguistic) along with a range of socio-cognitive competences in order to carry out a set of purposeful actions in a particular domain (interpersonal, transactional, academic and professional) with a clearly defined goal and a specific outcome.

How are lessons planned?

Lesson planning will be developed based on scenarios that focus on one or more of four different domains.

A unit is six weeks. Lesson plans are created weekly based on themes. Here is an example of how it can be done.

Template Elements	
Level	Grade level of the unit
Unit	1 of 6 in a year, includes Scenario, 4 themes, Enduring Understanding, Essential Question, Goals, pillars of learning, mediation strategies, assessment, and an Integrated Mini Project
Domain	Refers to the broad sectors of social life in which social agents (learners) operate
Scenario	A real-life context referenced for an entire unit
Themes	The focus of attention for each week that refers back to the real life scenario. (context rather than content)
Enduring Understanding	Big ideas to guide the teacher that give importance and meaning to a set of curriculum expectations and have a lasting value for learners, beyond the classroom. (1 per unit)
Essential Question	A question which fosters understanding and critical thinking in learners. (Can be adapted to theme.)
Linguistic Competencies	Oral and Written Comprehension (listening and reading); Oral and Written Production (spoken interaction, spoken production, writing).
Goals	Can-do performance descriptors
Oral and Written Comprehension	What a learner can understand or can do when listening and/or reading.
Oral and Written Production	What a learner can speak and write.
Learn to Know	Learning pillar that includes Grammar and sentence frames, Vocabulary, and Phonetic Awareness/Phonology.
Grammar & Sentence Frame	The grammatical components that will be covered in the unit.
Phonemic Awareness/ Phonology	The part of the lesson that addresses the Learner's ability to hear, identify, and manipulate sounds.
Vocabulary	Words learners need to know to communicate effectively within a domain, scenario, and theme.
Learn to Do	Learning pillar that includes Functions and Discourse Markers
Function	The use of spoken discourse and/or written texts in communication for a particular purpose (e.g. asking and giving information, describing).
Discourse Markers	Linking words or phrases that connect one piece of discourse with another one (e.g., <i>and</i> , <i>because</i>).
Learn to Be and Live in Community	The Learning pillar that includes Psycho-social, Sociocultural, Social Language, Idioms, and quotes.

Template Elements

Psycho-social	Attitudes, motivations, values, beliefs, cognitive styles, and personality factors.
Sociocultural	Politeness conventions, expressions of folk wisdoms, register differences, dialects and accents
Suggested Mediation Strategies	Organized, purposeful and scaffolded learning experiences
Assessment Strategies	Required evidence of student's learning
Integrated Mini Project	A more complex task which includes a four-phase process (participating, thinking, acting out, responding and sharing) that integrates skills and unit's goals and leads to a final product.

General Mediation Principles for Third Cycle and Diversified Education

English teaching places priority on the fine-tuning of learners' communicative competence involving oral comprehension and oral and written communication so that they become independent users of English and can reach the B1 or A2+ level, based on the descriptors of the CEFR.

- Teachers can select three or four goals per week from the units. They can combine oral or written comprehension with oral and written production, depending on the pedagogical purpose of the lesson.
- Teachers start each theme of a unit's scenario and lesson with a warm-up activity. Then they share the essential question with the learners and the learning goals/expected outcomes for that day or week.
- The enduring understanding is shared by the teacher at the beginning of each unit to connect students with the core ideas that have lasting value beyond the classroom.
- Lessons follow a task-based approach combined with the action-oriented approach.
- Grammar is developed by combining both inductive and deductive instruction within a meaningful context.
- The teacher follows a set of integrated sequence procedures as presented below to develop the different linguistic competences.

Mediation Sequence

Comprehension		Production	
Oral	Written	Oral	Written
<ul style="list-style-type: none"> • <i>Planning</i> <ul style="list-style-type: none"> ✓ pre-listening ✓ motivating ✓ contextualizing ✓ explaining task goal • <i>Listening for the first time</i> (general understanding); • <i>Pair/group feedback</i> • <i>Listening for the second time</i> (more detailed understanding) • <i>Self/co- assessment</i> 	<ul style="list-style-type: none"> • <i>Planning</i> <ul style="list-style-type: none"> ✓ pre-reading ✓ explaining task goal ✓ use typographical clues ✓ list difficulties and strategies on how to cope • <i>Reading for the first time</i> • <i>Pair/group feedback</i> • <i>Reading for the second time, post-reading</i> (for reacting to the content or focusing on features/language forms) • <i>Self/co-assessment</i> 	<ul style="list-style-type: none"> • <i>Spoken interaction</i> <ul style="list-style-type: none"> ✓ Planning ✓ Organizing ✓ Rehearsing ✓ interacting • <i>Spoken production</i> <ul style="list-style-type: none"> ✓ Planning ✓ Organizing ✓ Rehearsing <p>Producing</p>	<ul style="list-style-type: none"> • <i>Pre-writing</i> • <i>Drafting</i> • <i>Revising</i> • <i>Editing</i> • <i>Publishing</i>

- Teacher makes sure that all learners understand task instructions.
- Teachers should ensure learners know how to use strategies through teacher scaffolding and modeling, peer collaboration and individual practice.
- Learners have at their disposition useful words, phrases and idioms that they need to perform the task. It could be an audio recording with the instructions and the pronunciation of the words and phrases needed.
- The task could involve the integration of listening and speaking or reading and writing and is given to students individually, in pairs, or teams.

- The learners complete the task together using all resources they have. They rehearse their presentation, revise their written report, present their spoken reports or publish their written reports.
- Teacher monitors the learners' performance and encourages them when necessary.
- The learners consciously assess their language performances (using rubrics, checklists and other technically designed instruments that are provided and explained to them in advance). Teachers assess performance, provide feedback in the form of assistance, bring back useful words and phrases to learners' attention, and provide additional pedagogical resources to learners who need more practice.
- At the end of each unit, the learners develop and present Integrated Mini-Projects to demonstrate mastery of the unit goals.
- The enduring understanding and essential question are central to articulate the three learnings: learn to know, learn to do and learn to be and live in community. The Integrated Mini-Project is an opportunity for students to integrate these three learnings in a single task.
- Teach and plan English lessons in English to engage learners socially and cognitively.

Classroom Setting in the Action Oriented Approach

When implementing the action oriented lessons in your English class; remember to:

- a) Consider learners' interests and needs.
- b) Offer opportunities to work in pairs, in small groups, and as a whole class.
- c) Create a context for learning and reflecting.
- d) Provide multiple opportunities to develop communicative competence.
- e) Use different classroom layouts: the horseshoe, chairs in a circle, traditional rows and nested tables in groups.

Phonological Competence and the Use of RAPP...

Phonological competence is the ability to recognize and produce the distinctive meaningful sounds of a language, including: consonants, Vowels, tone patterns, intonation patterns, stress and rhythm.

What to do to learn and teach phonological competence

Recognize

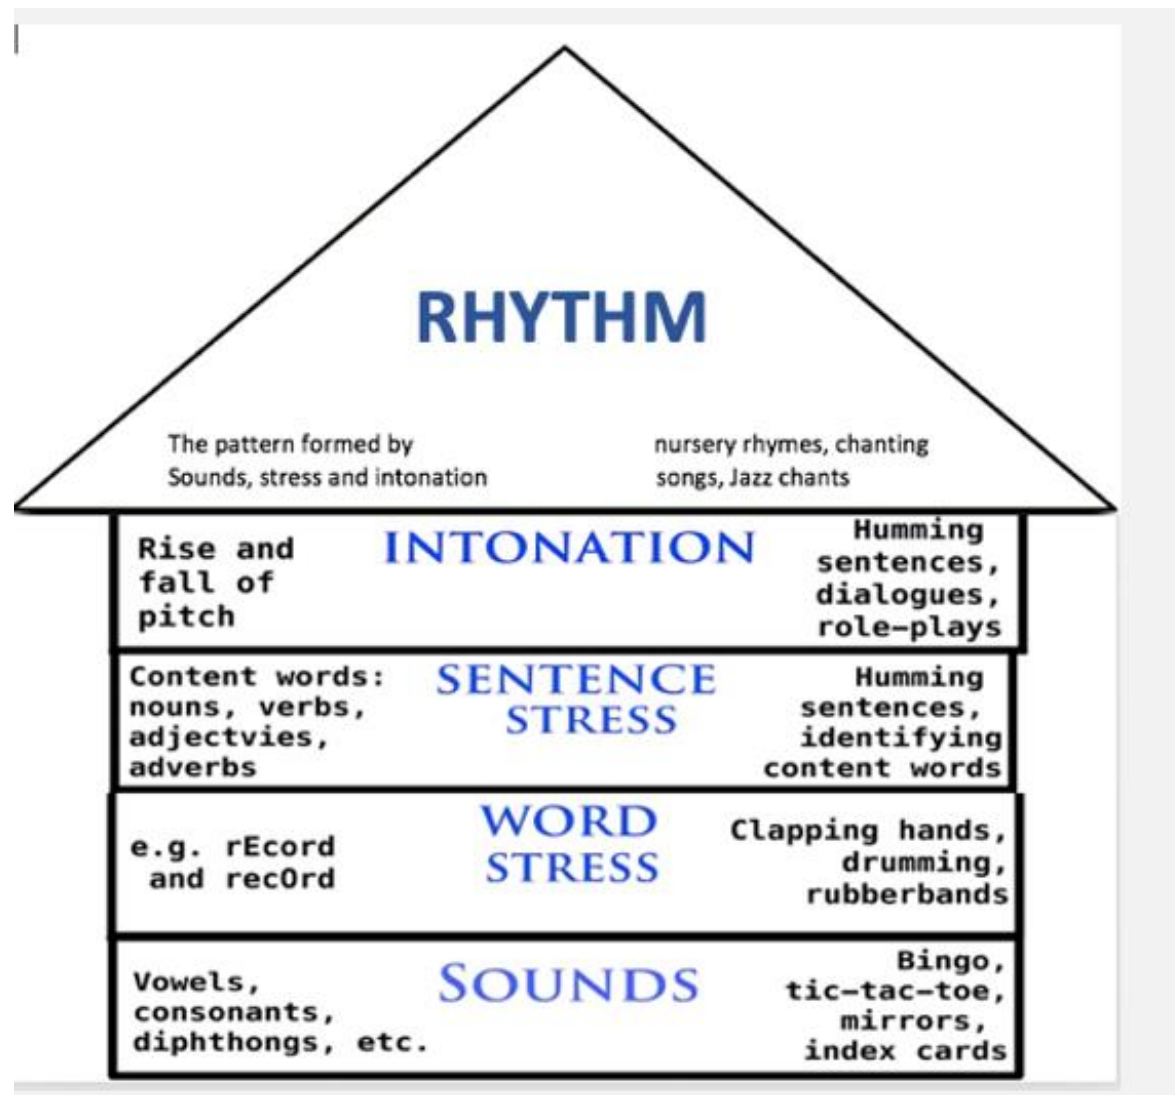

- the sound, word stress, sentence stress, intonation, rhythm or notes, often in comparison to something else.
- Isolated
- Repetitive
- Embedded

Articulate the sound

- What does it take to make the sound? (which “tools” are used to make the sound? Teeth, lips, tongue, air, no air, vibration, no vibration etc.)
- Which syllables are stressed? What happens to the non-stressed syllables?
- Which notes are involved?
- How can I figure out the rhythm?

Practice & Produce

- Produce the sound, stress, notes or rhythm
- Slowly **produce??** the isolated sound, stress, notes or rhythm.
- Repeat**, slowly gaining speed.
- Embedded in a longer utterance

And you can also use

R.A.P.P.P.P.P.

- **Recognition (aural and cognitive)**
- **Articulation**
- **Productive Practice**
- **They are not linear. But can be... But don't have to be**

How is learning assessed?

Assessment is a purposeful, continuous, contextualized, authentic, reflective, investigative, systematic and multi-phase process, which responds to these four fundamental questions: Why assess learning? What learning to assess? How to assess it? Which are the pedagogical implications in the learning?

The purpose of assessment is to serve each learner's growth and learning. To prevent student's failure and allow timely intervention, assessment allows teachers to detect learning gaps so that learners can receive the support needed to be successful. The "what" of assessment involves gaining clarity about the knowledge, skills, abilities, and attitudes (learn to know, learn to do, learn to be and live in community) that learners have to develop as established in the curriculum goals or "can do performance descriptors". This implies that assessment will mainly be performance-based. Learners are required to demonstrate through integrated-skills tasks within a domain, scenario and theme, specified knowledge, skills and abilities using the target language. Assessment can also be discrete point, which means the use of selected response tasks to isolate and measure discrete units of grammatical knowledge, which encompasses grammatical, semantic and pragmatic knowledge -- form, meaning and use (Purpura, 2014, p 9). Assessment will also be authentic which means that the assessment task will simulate real-life situations within domains and scenarios beyond the classroom setting, and the socio-cognitive, socio-affective, socio-cultural and linguistic demands on the learner will be similar to the one of a speaker in a target language setting.

Classroom assessment mirrors the learning goals, content of instruction and instructional practices; therefore, curriculum, teaching, and assessment must be coherent for learning goals to be achieved and learners' communicative competence to be developed.

Task design, task performance, and assessment become a fundamental unit of instructed learning; tools such as analytic and/or holistic scales, rubrics, progress indicators and checklists play an important role for obtaining valid and reliable qualitative and quantitative data about students' learning and performance.

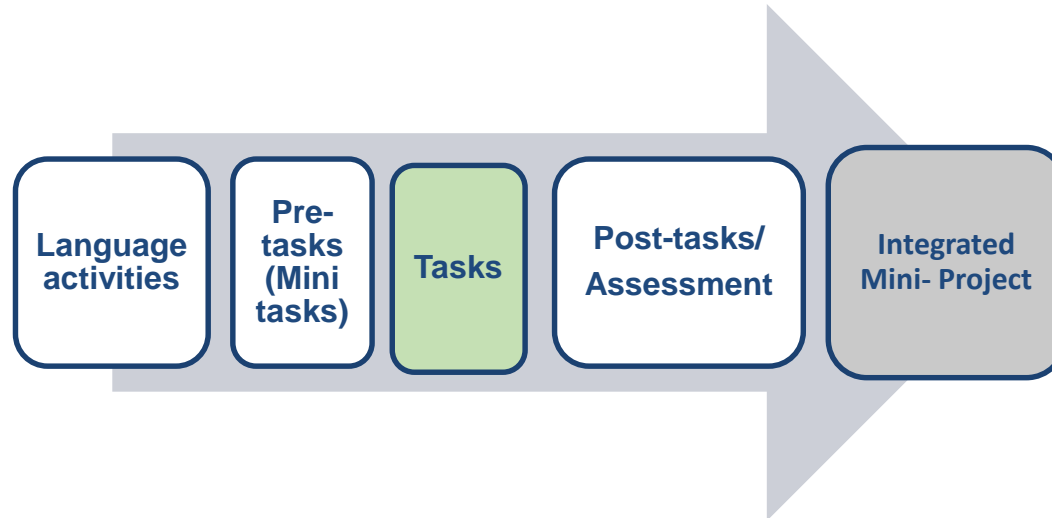

Integrated Mini- Project

A more complex “learn to do” classroom task for each unit.

- ✓ Learners (as social agents) integrate knowledge, skills and abilities (KSA), within the domain, scenario, themes, the enduring understanding and essential questions of the unit
- ✓ Proactive (not reactive)
- ✓ Interconnected with classroom activities
- ✓ Formative, skill-integrated performance
- ✓ Collective actions (social dimension)
- ✓ Promotes democratic citizenship (CEFR p.12)
- ✓ Integrates skills and unit’s goals and leads to a final product.

AOA Task Oriented to a Product
Keep the end in mind!

Phases for the Integrated Mini-Project

1. Participating/Negotiating (Week 1 or 2)

Brainstorming, discussing, negotiating, making decisions to form different groups according to their interest, language abilities, etc.

2. Thinking/planning (Week 3 or 4)

Planning, negotiating and finding information collaboratively about the language content and strategies, resources and organizing the work to distribute assignments among the group members.

3. Acting out/Completing MP (oral/written) (Week 5)

Completing the product, rehearsing, practicing the mini-project presentation.

4. Responding and Sharing (Week 6)

Groups creatively deliver the mini-project, answer questions from the audience and in pairs, or groups self or co-assess it.

7th - Unit 3 – Example

Promoting local tourism

Integrated Mini-Project: Tourist Brochure to support local tourism

Task description:

You want to show the most important tourist attractions to support local tourism. Design a brochure to promote local tourist attractions. Keep in mind the following questions to guide your product: Is this an authentic communication action? Is it useful in everyday life?

Phase 1: **Participating to negotiate:** (5 or 10 minutes in week 1 or 2)

Choose your mini project and get in groups of 3-4 participants and negotiate in order to plan the next phase.

Phase 2: **Thinking for planning:** (5 or 10 minutes in week 3 or 4)

Plan your brochure. Think what to do (the information you need to find, the time and organization of the work (what to write and distribute what each member is going to do).

Phase 3: **Acting out to complete the Mini Project –oral & written:** (week 5)

In your group, complete the brochure in class, rehearse and organize the presentation.

Phase 4: **Responding and sharing** (week 6)

creatively present the brochure to the class, respond to questions from the audience using the instruments to self or co-assess the project (or brochure)

		<p style="text-align: center;">Pre-teaching</p> <p>Routine: Checking attendance, checking in with Ls, T posts the Essential Question on the board, Can Do's, and class agenda, etc.</p> <p>Participating: Warm up Learners make groups of four and play charades. The teacher will show pictures of jobs -- the group that guesses the most occupations in the least amount of time wins.</p> <p>Engaging: Activation of prior knowledge Learners play "Typhoon." The group is divided into two teams with a set of pictures pasted on the board in a grid formation. Learners choose a card and answer the following questions: Where does she/he work? What does she/he do? If the team answers correctly, they take the card and look on the other side to see what number of points they received. Every card is going to have points and some will also have letters. If they get a S(steal), it means that that group can steal that number of points from another group, D(double) means that the team receives double the number of points on the card, and T(typhoon) means the group wins the entire game.</p> <p>Introducing The teacher tells the story "Brenda's Job." While the teacher tells the story, she/he shows learners pictures related to the actions that use the structure of the past perfect.</p> <p>Later, the teacher explains the use of intensifiers, indications of time, and the past perfect structure using simple examples.</p>

As students talk, the teacher writes the jobs on the board. He/she also elicits from the rest of the students some other jobs, which were not mentioned. Using the list from the board, the teacher asks questions such as, <i>“Ana, Luis...When you were younger, had you ever wanted to be one of these professions?”</i> Questions are asked to most of the students.</p> <p>The teacher sets up the context of the audio by telling the students who the speaker is and what she is going to talk about.</p> <p>Listening for the first time Learners listen to the audio “Life Stories from Radio 2” for the first time. Learners try to answer the question: <i>“What was the story about?”</i></p> <p>Pair/Group feedback Learners compare their answers, and then they share with the whole group.</p> <p>Listening for the second time Learners listen the audio again, but this time, as they listen, they work on a True and False exercise. Ss check their answers in pairs and then share with the group.</p> <p>Post-listening Students write a short story about a job experience that they have had, they have heard about, or that they imagine. Then, they share their story with the rest of the class.</p>

The teacher shows the pictures of some jobs in Costa Rica (accountant, actor, architect, artist, assembler, baker, bus driver, butcher, construction worker, farmer, delivery person, firefighter, fisherman, lawyer, pharmacist, police office, taxi driver, waiter). Then the teacher writes on the board the phrase “Help Wanted” and asks students for the meaning. Learners observe different ads about jobs pasted on the board and try to guess the meaning.</p> <p>Reading for the first time: The learners get a worksheet with four ads. The worksheet contains ten “had you ever...” questions about work or life experiences. Working individually, students write their own responses. Then, they will write one follow-up question for each item on their worksheet (there is a useful vocabulary list in the last column of the worksheet). The teacher provides help if necessary.</p> <p>Rehearsing The class is divided into groups of five or six students. In their groups, learners will ask each other the questions on the worksheet. If a student responds to a question with “yes,” all of the other students will write his/her name down and take turns asking one of their follow up questions. For example, a student could ask, “Had you ever worked on a farm before?” and if the answer is “yes,” a follow up question could be, “Which farm did you work on?”</p> <p>Interacting/Describing Students will fill out an information gap activity about “Life Stories” from Radio 2. Student A will ask the questions to student B and write down his/her answers. The students will then switch roles and repeat the activity, and conclude by reporting to the class the responses.</p>	
Integrated Mini-Project			Time
<p>Participating to negotiate: (5 or 10 minutes in week 1) In pairs, learners check for job ads either on online or printed newspapers. Learners check the ads and decide on one they would like to apply for.</p>			<p>Adjust previous times listed above to allow 5 min each week. Group presentations can be week 5 or 6.</p>

Week#1

Introducing

Brenda's job

Brenda had always wanted to be a lawyer because she was passionate about justice. By the time she was 15 years old, she had read all of the court cases in her town. She had hoped to become a lawyer in Liberia where she wanted to focus on family law. Specifically, she had wanted to fight for children's rights. She worked hard for 20 years, and by the time she was 45, Brenda had become one of the most respected lawyers in Costa Rica.

Week#1

Pre-listening

"Life Stories" Radio 2

Hello and welcome to Radio 2. Today on Life Stories we are going to talk with a very impressive young man, Danny Alvarez Rojas. Danny recently became the youngest architect in all of Costa Rica. Today we are going to hear a little about his story.

J: Hello Danny, how are you today?

D: I am great, and yourself?

J: I am fantastic, thank you. Danny, you have such a fascinating story. Two years ago you were in high school and this year you are designing buildings as the youngest architect in Costa Rica. Tell me, how did that happen?

D: While I was in high school, I was also attending architecture classes at INA. I took a test that allowed me to skip grades at the UCR so I was able to finish early. I graduated with my degree by the time I was 20.

J: Now, did you always want to be an architect?

D: When I was a kid, I wanted to be a firefighter. I had hoped to stay in San Jose and work at the local fire station, but everything changed when I was 16.

J: What happened?

D: I took a woodworking workshop at my technical high school and discovered my love for building. I was really interested to learn more about the process of how buildings are created. It felt like art to me and I loved it.

J: And your work demonstrates your passion – each of your designs looks like art.

D: Thank you.

J: We have many young listeners who are worried about their futures. What advice would you have for current high school students?

D: It is really important to get your foot in the door as early as possible – whether it is volunteering at a local organization or pursuing internships. You'll be very grateful for your hard work and dedication as a young person, because I promise, it pays off.

J: What great advice. Thank you again so much Danny for taking the time to come chat with me.

D: It was my pleasure.

		<p style="text-align: center;">Pre-teaching</p> <p>Routine: Checking attendance, checking in with Ls, T posts the Essential Question on the board, Can Do's, and class agenda, etc.</p> <p>Participating : Warm up Learner will play a board game about jobs in pairs. First, a student will roll a dice and move the specified number of spaces. If they land on a question, they will have to answer it correctly. If they answer incorrectly, they will have to move backwards three spaces. If a student lands on a monkey, they will jump ahead to the stated space. If they land on a crocodile, they will have to start the game over.</p> <p>Engaging : Activation of prior knowledge Teacher will paste around the class different pictures about jobs. Teacher asks the following questions:</p> <ol style="list-style-type: none"> 1. Which job is the most interesting to you? 2. Which job is the least interesting to you? 3. Which job do you think has the highest pay? <p>Students have to move around the class according to their preferences.</p> <p>Introducing Students are going to watch a video called “Mock Job Interview to Donald Trump” (https://www.youtube.com/watch?v=Xb7jWw5lft4)</p> <p>Teacher will ask the following questions to students:</p> <ol style="list-style-type: none"> 1. Is being the president of the United States the most important job? 2. What did he say was one of his strengths? (He said that his...) 3. What did he say was one of his weaknesses? <p>L.2. discriminates main points, concepts, key points and details from television programs, radio, and web-based broadcasts/ announcements, small group discussion, between two or more native speakers, in a video/audio recording at normal speed.</p>	<p>L2. follow a small group discussion between two or more native speakers if that conversation is unhurried and if the learner is familiar with the topic under discussion in a video/audio recording about jobs and occupations.</p>	<p>Later the teacher will clarify the meaning of some phrases from the video to students.</p> <p style="text-align: center;">Oral Comprehension:</p> <p>Pre-listening The teacher shares the goal of the lesson. Learners play a team game called “Who Am I?” Teacher divides the group into two or three teams. Each team is going to have a set of cards with different descriptions of jobs. One team reads out the clues slowly and clearly - one by one - on one of their cards. Don't let teams show each other their cards. Other teams listen and try to guess the job. ONLY ONE GUESS IS ALLOWED, so teams have to work together and not guess too quickly.</p> <p>If all the clues are exhausted, teams can show the picture or give extra clues. Teams score one point per correct answer.</p> <p>After concluding this activity, the teacher will set up the context of the audio by telling the students who the speakers are and what are they going to talk about.</p> <p>Listening for the first time Learner listens to the conversation between Michael and Rebecca for the first time. Learners try to answer the question: <i>“What was the dialogue about?”</i></p> <p>Pair/Group feedback Learners compare their answers, and then they share with the whole group.</p> <p>Listening for the second time Learners listen to the audio again, but this time, as they listen they answer some questions. Students check their answers in pairs, and then share with the group.</p> <p>Post-listening Teacher will divide the group into two or three teams. He/she will give each team a picture of a job and they have to brainstorm about why it is the best job, some of the benefits of that job, what some of the requirements would be, and a short description of the job.</p>

<p>R.2. discriminates information of charts and graphs read.</p> <p>SI.2. explains with simple words what he/she means with another word orally when he/she can't think of the exact word</p>	<p>R2. understand charts and graphs.</p> <p>SI2. explain what he/she means with another word when he/she can't think of the exact word.</p>	<p>Later students are going to have a debate about which jobs are the best.</p> <p style="text-align: center;">Written Comprehension:</p> <p>Pre-reading The teacher shares the goal of the lesson. Then gives a list of phrases to describe charts and clarifies the meaning.</p> <p>Then the teacher will ask the students to write a survey about some topics such as food they like, leisure activities, sports, movies, music, etc. For example:</p> <ol style="list-style-type: none"> 1. 1.What kind of music do you like the most? 2. 2.What is your favorite drink? <p>After they record the answers from the other students, they will make a graph using the data collected in the survey.</p> <p>Reading for the first time The learners get a worksheet with a graph. Learners are then given a minute to quickly look at the graph and decide what the graph is depicting and write a check mark next to the corresponding title.</p> <ol style="list-style-type: none"> 1. _____ Jobs in Costa Rica 2. _____ Best paid jobs in Costa Rica 3. _____ Technical careers in Costa Rica 4. _____ Academic careers in Costa Rica <p>Pair/Group feedback Learners compare their answers, and then they share with the whole group.</p> <p>Reading for the second time Learners will answer some questions based on a graph about the "Top Ten Technical Careers in Costa Rica with the Most Graduates."</p> <p>Post-reading</p>	
---	---	--	--

		<p>Learners work in groups. Together they will write a survey with three questions about jobs. The teacher will give some examples such as: What is the most exciting job? Which is the best paid job?</p> <p>Students use this information to draw a graph and explain what they got to the rest of the class.</p> <p style="text-align: center;">Spoken Interaction/Production</p> <p>Planning/ Organizing The class is divided into four groups. Each group chooses two words related to jobs and writes them down on a piece of paper. The teacher will collect the words and put them into a bag. A student will draw a word from the bag and describe the word. For example, if the word is “firefighter,” a student could say “this person’s job is to stop fires.”</p> <p>The students try and guess the word for a point for their team.</p> <p>Note: The purpose of this activity is to teach students a practical skill for communication. Frequently, language learners will be speaking English and encounter a moment where they do not know a word and they may feel stuck or unable to continue with the conversation. However, there are many ways one can still communicate meaning without knowing a specific word or direct translation. Share with learners that this is a very useful skill that they will utilize when speaking English outside (or inside) the classroom.</p> <p>Rehearsing Each group writes two definitions of two words related to jobs. Then students will practice orally the pronunciation of the definitions in order to be ready for the next step.</p> <p>Interacting/Describing There will be a table in front of the class. On the table there will be four boxes labeled A, B, C, D. The teacher will pick up the definitions and put them in different boxes according to each group. The teacher asks for a volunteer from each group to pick up a definition. The learner will read the definition aloud to the group he/she belongs to, they will have around one minute to guess what the word is. The group that gets the most words is the winner.</p> <p>Students play a game “Guess the Word.” Teacher places pre-cut words into four separate bags/containers. The class is divided into groups of even numbers (groups of 4 or 6 is best). Within these groups, learners will make even teams.</p>	
--	--	--	--

		<p>Each team will have one minute for their turn. When the timer starts, one student will draw a word from the bag. They must give their teammates clues about the word by describing it in different ways. They cannot use the word on the piece of paper or any variations of it. For example, if the word is “baker” the student can say “someone who makes bread” but not “someone who bakes bread.”</p> <p>After their teammate guesses the word correctly, the same learner will draw another word from the bag and describe it. This continues until the minute is over.</p> <p>Meanwhile, the other team must stay silent until it is their turn. After the one-minute timer is up, it is now time for the other team to give clues and guess to their own team members.</p> <p>Each word guessed correctly is one point.</p>	
Integrated Mini-Project			Time
<p>Participating to negotiate: (5 or 10 minutes in week 2)</p> <p>In pairs, and based on the job ads they chose in week 1, learners look for more information online about the requirements a professional applying for those jobs should have. Learners write a list of the qualifications employers are looking for.</p>		<p>Adjust previous times listed above to allow 5 min each week. Group presentations can be week 5 or 6.</p>

Week#2
Introducing

Mock Job Interview for President with Donald Trump

Superlative Forms:

“You’re running for the biggest job in the world.”

“Really, the most important job.”

Questions from the Interview:

1. How did you hear about the position?
2. Do you want to tell me a little bit about yourself?
3. Why do you want this job?
4. What are your strengths?
5. What are your weaknesses?
6. Are you willing to relocate?
7. Is media attention something you are comfortable with?

Putting it into US Context:

Informal language: “Too nice for too long.” → “Too nice” means that you don’t want to upset anyone, so you allow people to take advantage of you in order to keep the peace. “For too long” means that you allowed someone to take advantage of you longer than you should have. In this context, Trump is saying that he lets he is too nice to people and that they take advantage of him.

Democrats, Republicans, liberal, conservative, and libertarian: these are all different political parties. The “are you willing to relocate?” question is because the person has to move to the White House, which is typically far from where they are from.

Job Promotion

Michael: Hello Rebecca! How are you today?

Rebecca: I am doing well, and yourself?

M: I'm doing great, thanks for asking! I've noticed that you've been so happy recently! What's been going on?

R: I recently got a job promotion at work and I love it!

M: Really? That's amazing -- congratulations! What is your new position?

R: I am now a full-time translator at a large international company!

M: Which company?

R: Dos Pinos!

M: Wow! What were you doing for Dos Pinos before you got your promotion?

R: I worked as an accountant, but I wanted to utilize my English skills. Now I work in the Sales Department as a translator.

M: How did you get that position?

R: My boss called me into his office and told me that they were expanding to the United States and that they needed someone who spoke English fluently to translate to new clients. He said that my English level was the highest out of all the staff! I applied for the position, and two days later, my boss told me that I got the job!

M: What a huge accomplishment! What has been the best part of your job so far?

R: I love that I get to travel! Next week we are going to Florida for a business trip. This is definitely the best job I have ever had!

M: I am so glad that you are so happy! I can't wait to hear about your trip to Florida!

R: Yeah! I will tell you about it next week! I'm on my way to a meeting right now, but I hope you have a great rest of your day!

M: You too! Bye!

There may be a</p>	<p>the proper order. Learners must arrange the steps of the job search process in the proper order. The teacher aids learners in this activity.</p> <p>Introducing: The teacher reviews the concept of a Job Interview and then presents a set of commonly asked questions in a job interview. Later, learners try to respond to those questions in a professional manner as if they were in a job interview.</p> <p>e.g.</p> <ol style="list-style-type: none"> 1. <i>Why do we need you in the company?</i> 2. <i>What's your major (professional degree)?</i> 3. <i>Where did you study?</i> 4. <i>Why are you interested in this position?</i> 5. <i>What are your skills?</i> 6. <i>What's your English level?</i> 7. <i>What are your long and short terms goals?</i> 8. <i>Why did you leave your last job? /Why did you quit your last job?</i> 9. <i>What are your salary expectations?</i> 10. <i>Do you have problems with the night shift?</i> 11. <i>What do you do when you face/have problems?</i> 12. <i>What are your weaknesses?</i> 13. <i>Mention 3 strengths you have.</i> 14. <i>Would you like to have your own company? Why?</i> 15. <i>How do you handle stress and pressure?</i> <p>After that, learners are given a strip of paper with one of the questions and form two equal groups. One group will be the inner circle and the other group will be the outer circle. Learners from the inner and outer circles turn to face one another to practice asking and responding to the above questions. After a short conversation, learners switch papers and rotate partners.</p> <p style="text-align: center;">Oral Comprehension:</p> <p>Pre-listening : Learners participate in a game called "<i>Finding the hidden definitions</i>" to recall relevant vocabulary in a Job Interview. In this activity, learners walk around the classroom looking for the definitions of the terms stuck on the board. The one who finds and matches the most definitions correctly, wins.</p>

They also brainstorm about some possible issues or questions people usually ask in a job interview.</p> <p>Listening for the first time : Learners listen to a job interview between Ms. Vázquez and Alejandra, the applicant. They assess the quality of Alejandra’s interview to decide whether she had a good or bad performance based on her answers.</p> <p>Pair feedback : Learners get in pairs to share their perspectives regarding Alejandra’s performance and to comment about different issues that she needs to improve next time she has an interview.</p> <p>Listening for the second time : Learners listen to the conversation again in order to identify specific information about the candidate. They will then create a professional profile of the applicant by completing a form.</p> <p>Post-listening: Learners form small groups to change the candidate’s bad answers to specific questions. Based on the information they got in the conversation, they restructure her answers to make them more professional. They identify the theme of the article, and some general information like the location, the date and time of the event.</p> <p>Group feedback: Learners form small groups to discuss their answers and talk about other details.</p> <p>Reading for the second time: In the same groups, learners specify the available fields and write down a list of requirements applicants need to be able to apply for a job opening, as well as the necessary documents they would need to include along with their résumé.</p> <p>Post-reading: Considering the article learners just read, working individually, they choose one of the available fields in the company. They also think about the requirements an applicant must have for the position they choose.</p> <p>Learners use the template provided by the teacher to organize the information they need in order to complete the résumé that could coincide with the requirements/expectations of the job fair in order to participate in the event.</p> <p>Once they have completed the template, they get in pairs and review each other’s rough drafts. Then they will choose one and improve it together.</p> <p>Finally, learners join another pair to present their final product and provide/get feedback.</p> <p style="text-align: center;">Spoken Interaction</p> <p>Planning: In groups of three, and bearing in mind the article learners read about Amazon’s Job Fair, they choose one of the fields they are interested in (Administration/ Human Resources, Customer Service) to inquire about further information.</p> <p>They need to think about specific requirements like personal qualities, professional experience, skills, and some company benefits.</p>

Before recording their messages, they need to test the quality of the recording (sound, clarity, volume, background noise, tone of voice).</p> <p>Describing: Learners record a WhatsApp message retelling their experience at the job fair, and then send the audios to other classmates. The teacher chooses some audios at random to share with the class and give feedback.</p>	
Integrated Mini-Project			Time
<p>Thinking for planning In pairs and continuing with the project guide for week 1 and 2, learners adapt the résumé they previously created in class to make it suitable for the position they wanted to apply for. They use the information they collected to highlight specific skills and professional/academic experiences they must have in order to be a competitive candidate for the position.</p> <p>Allow time for the Mini-Project each week. NOTE: All phases of the Integrated Mini-Project should be opportunities for Ls to practice English, not just those related to presentation.</p>			<p>Adjust previous times listed above to allow 5 min each week.</p> <p>Group presentations can be week 5 or 6.</p>

1. Vocabulary for the pre-listening activity

Interview: A conversation between a job applicant and an employer to assess the qualifications of the applicant and decide if they should be hired.

Skills: Abilities or experience which enhance a person's ability to complete a given task

Salary expectations: Also known as compensation expectations, is the amount of money an employee expects to make for performing a certain job

Long term goals: Something you want to accomplish in the future. They require time and planning.

Strengths: Tasks or actions you can perform well. These include skills, proficiencies and talents.

Weaknesses: Lack of strength in a specific field or task

Full time job: A job someone does every day, 8 hours a day, five days a week. Typically, a full time job consists of working 40 hours a week.

Part time job: Is something you do in your free time, like 2 or 3 hours per day or during the weekends to earn extra money if you are a student.

Schedule: A list of planned activities or things to be done showing the times or dates when they are intended to be done.

Profile: A short piece of paper giving a description of a person, background and skills.

Professional experience: Experience that occurred through full time employment in a specific field.

A good fit: It is often determined by those conducting the interview and it is a mixture of both personality and skills. In other words, someone is suitable for the position.

Overcome: To get better in a struggle or conflict.

2. Interview Script for the listening activity

Interviewer looks at her watch it's 9:14am, the interview was supposed to start at 9:00am

-Applicant finally enters the room-

Applicant: Hey there, are you Emily? Sorry I'm late, I totally forgot about this interview (laughs in a carefree manner)

Interviewer: Hello, yes I'm Ms. Vasquez. You must be Alejandra, it's nice to see you, although I was expecting you here at 9:00am. Well, let's get started, I have a busy schedule today and don't have too much time. Please, have a seat.

Interviewer: So, Alejandra, tell me about yourself.

Applicant: Well, there's not much to say. I like to play volleyball and hang out with friends. I just hiked around Volcan Arenal last weekend, that was pretty fun!

Interviewer: That's nice, but I'm hoping you can tell me about your professional experience. Where did you study and what did you major in?

Applicant: Oh yeah, I just graduated from Universidad de Costa Rica, barely, it was really difficult! I studied Bilingual Secretary. One semester I almost didn't pass my classes because I wasn't able to go to all of the exams and also there were some problems with my final projects. One of my professors told me that...

Interviewer (interrupting the applicant): Sorry to interrupt you, but we need to stay on task. Can you tell me about your strengths? What makes you a good fit for this job?

Applicant: Hmmm, that's a tough question. I think I'm a really nice person. Oh, and I have some bilingual language skills, too.

Interviewer: Okay, and what is your biggest weakness? How will you overcome this as a receptionist here in our company?

Applicant: Well, I'm really bad under pressure. I tend to get really nervous and I can't get my work done in a stressful environment. I'm also not a very good leader, I get really scared in front of big groups.

Interviewer: And what are some of your long-term career goals?

Applicant: Uhhh...I'm not sure. I hope I have a job that is cool, I guess.

Interviewer: Okay, thank you for your response. My final question is about your work experience. Where did you work and why did you stop working there?

Applicant: I worked as a waitress for a few years at a cafe. But I quit because the manager annoyed me.

Interviewer: Okay, thank you. And do you have any questions for me, Alejandra?

Applicant: Hmmm, yeah, would I have to work weekends?

Interviewer: Yes, the schedule for this position is Monday through Saturday from 6:30am to 4:30pm.

Applicant: Ah man, okay I guess.

Interviewer: Okay, Alejandra, I think I have enough information now. Thank you for coming in.

Applicant: You are welcome! Bye, Emily!

3. Newspaper article for the reading activity

Amazon expands Costa Rica operations

Costa Rica announced that it will hire 400 new employees for its support services centers in the provinces of San José and Heredia.

The U.S. online retail giant will be hiring staff for management positions in administration and human resources, and will be looking to recruit technical staff for customer service.

Candidates should be proficient in a second language including English, Portuguese, German, French or Italian.

“At Amazon we grow and hire all the time. We are happy to create jobs and we invite all interested candidates with excellent command of English or other languages to come to our facilities or to apply online,” said General Manager of Amazon Costa Rica Alejandro Filloy.

Job interviews will be conducted at the company’s facilities on Calle Blancos, northeast of San José, where Amazon will hold a job fair on Thursday, July 9 from 7:00 a.m. to 2:00 p.m. Interested candidates also can apply online at: www.amazon.jobs.

Amazon Costa Rica currently employs some 2,500 people who provide technical and administrative support to customers and distributors in the U.S., Spain, Mexico and Brazil.

Candidates must take:

- 2 printed copies of their resumé
- 1 photo of their ID
- 1 printed background check.
- Original copies of all their diplomas.

Adpated from Tico Times newspaper.

MATERIALS FOR WEEK #4

1. Useful Expressions for the interview – Spoken Production

Phrases that the interviewer can use:

- Can you please explain to me why you like / don't like your job?
- Could you tell me a negative/ positive experience?
- Have you ever had to work under pressure?
- How did that make you feel?
- What was the most challenging experience you've had as a...(teacher, doctor, chef, politician, nurse?
- Finally, what is a rewarding experience you've had at this job?
- Could you work on weekends?

Words that the interviewee can use in their response:

- Not always or Not all the time...for example, once I...
- I had felt stressed-happy-overwhelmed-frustrated when...
- I enjoy my job- don't enjoy my job because...
- The most challenging experience I've had was....
- A moment I felt proud or happy during my job was...
- By the way...
- There is something I wanted to tell you.....

silviaflores@apple.com

Dear Ms. Silvia Flores Segura,

In December of 2018, I graduated from the *Instituto Nacional de Aprendizaje* of Ciudad Quesada with a degree in Bilingual Customer Service. The intense academic courses and professional development opportunities that I took advantage of at INA have prepared me to be an important asset to the Apple Inc. team. I am confident in my ability to successfully complete the duties of the Customer Service Manager at your call center in San José. After speaking with an Apple Inc. representative at a recent job fair I attended, I decided to submit my application.

In addition to my technical degree, I bring with me two years working experience as a bilingual customer service assistant-manager for Amazon. In this position I ensured guest satisfaction and implemented trainings and developmental workshops for our employees. I appreciate Apple's guest-centered approach to sales, and I embrace the team oriented company environment. My previous work experiences have enhanced my leadership skills as well as further developed my organizational and communication skills.

I appreciate the consideration of my application for the Customer Service Manager position. Enclosed are copies of my résumé and university transcripts. I eagerly await your response and intend to inquire about the status of my application within the week.

Best regards,

Luciana Vargas Rojas

Dear [Hiring Manager's Name],

The first paragraph should contain a self-introduction. You should write who you are, where your expertise lies, where you found the job posting, and why you want to apply for the job.

The second paragraph should respond directly to the job description written by the hiring manager. Describe how your previous job experiences, skills, and abilities will allow you to meet the company's needs. To make that easier, you can (and should) literally include words and phrases from the job description in your cover letter.

- You can include a bulleted list of your accomplishments
- Make sure you quantify (add numbers to) these bullet points
- A cover letter with numbers is 100% better than one without

To go the extra mile, do some research about the company, and try to find out what they are doing — and why — given the current state of their industry. Explain how you can fit into that schema, and help push the company forward and achieve any goals you suspect they may have.

The final paragraph is called the "call to action" portion of your cover letter. Inform them that you'd love to get interviewed. Give them your contact information. Tell them that you'll be in contact with them in a week if you don't hear back. Thank them for spending the time to read your cover letter.

Sincerely,

- Did Ls use English during all aspects of Integrated Mini-Project?
- How did project presentations reflect understanding and/or mastery of Can Do statements?
- Did Ls put into practice the focus of Learn to Be and Live in Community?
- Did the Integrated Mini-Project provide answers to the Essential Question?

Good Night Stories for Rebel Girls: Book Review

Good Night Stories for Rebel Girls is for people who want something different from fairy tale princesses. Here you can read the stories of one hundred amazing women from the past and present.

We all know how fairy tales go. A beautiful girl waits for a prince to find her. Then she gets married to him and becomes a princess. But what if the girl was clever or strong instead of beautiful? What if she wanted to be an astronaut, a politician or a pirate instead of a princess? And what if she didn't need a prince to do it? That's the idea behind the book *Good Night Stories for Rebel Girls*. It's a book of fairy tales with a difference: all the stories are true.

The book tells the stories of one hundred amazing women from 1500 BC to today. But, the stories aren't just boring biographies. Instead, they're like fairy tales. You probably won't know the names of most of the women but, when you finish reading, you'll ask yourself why.

Why haven't we learned about these women before? Often history remembers men more than women. If you close your eyes and think of a war hero and a pilot, you probably think of men. If you read the book, those pictures might start to become women of all colours and ages. The women in the book did things because they wanted to and they didn't listen when people told them not to.

One problem with the book, unfortunately, is its name, because it gives the idea it's a book for girls. It's a great idea to show young girls what women can do. But the stories are also interesting for boys to read. And it's also important that boys can think of women in jobs like doctor, Formula One race car driver and president.

Not all the women included are 'good girls'. One woman, Jingū, Empress of Japan, decided to start a war with Korea because of a dream. Is it a problem that the book doesn't say that was a bad thing? Another example is pirates. The two women pirates in the book are unusual heroes because pirates were dangerous and they killed other people. It's good to see a variety of women but why not show a bad ending to their story sometimes? We can understand that just because they're female, they're not always good people.

You could read one story every night but you probably won't want to stop with one. If you finish quickly, don't worry because there are now two *Rebel Girls* books.

They will have to make pairs. Learner A will see picture in learner B. Learner B will ask "YES/NO questions" trying to guess what the movie on his back is and vice versa. They can ask 3 questions per person, and they will have to pick a different classmate and repeat the strategy by asking different questions. “It was a science fiction film written and directed by James Cameron. The film had incredible special effects, which took people to a spectacular world beyond imagination. The film was set in the year 2154 on Pandora, a fictional Earth-like moon in a distant planetary system. Jake Sully, a former U.S Marine paralyzed from the waist down was selected to participate in the program. Using a genetically engineered human hybrid who looked like the creatures in that planet, Jake was sent to gain their trust and convince them to leave their sacred home. “

The teacher interacts with the learners and provides them with clues to guess which the movie is (Avatar).

The teacher then introduces key vocabulary to talk about films: genre, setting, actor, plot, climax, and critics. For each of the sections, the teacher writes the expressions on the board and explains them to the learners using real examples from famous films.

Learners choose a movie they like and create a mind map with adjectives to describe the acting, the special effects, the music, the photography, Then, learners, in pairs, share their opinions about the movie, using the mind map as a guide.

Annihilation review – Natalie Portman thriller leaves a haunting impression

Ex Machina writer-director Alex Garland's unnerving sci-fi concoction combines gut-wrenching body horror and trippy science to compelling effect

Natalie Portman and Gina Rodriguez in *Annihilation*, a genre film that revolves around intelligent characters reacting intelligently to fantastical events. Photograph: Photo credit: Peter Mountain/Peter Mountain

There are ample reasons to be both excited and concerned about *Annihilation*. It's the writer-director Alex Garland who has chosen to adapt Jeff VanderMeer's award-winning novel, packed with visceral horror, weighty ideas and unusual storytelling.

Lena (Natalie Portman), a biologist, is in a daze. Her soldier husband (Oscar Isaac) is missing in action and without him, she is struggling to focus on what remains of her life. But when he suddenly returns, her brief hope that normality will ensue is shattered when his odd behavior turns into something far more destructive. He's hospitalized and she's whisked away by a psychologist (Jennifer Jason Leigh) who informs her that his mission took him inside "the shimmer", a rapidly expanding area that's taken the lives of everyone who has entered, bar him. She soon joins a new mission to find out what's inside and discover whether she can save her husband's life.

It's hugely refreshing, and remarkably uncommon, to watch a genre film that revolves around intelligent characters reacting intelligently to fantastical events. The team is made up of briskly efficient problem-solvers who remain practical and focused while dealing with otherworldly chaos. Unlike with so many superficially similar films, as an audience we understand and empathize with the decision-making process, the script never sacrificing its smarts for suspense. It's tightly constructed and empty of unnecessary exposition yet the characters mostly feel like they are more than their various professions. This is also down to a strong set of performers and while it's rare to see an all-female ensemble in a film of this ilk, Garland has little time for gender, imagining a future where such distinctions don't warrant recognition.

Assessment Strategies & indicators of learning (Diagnostic, formative, summative)	Learner can	Didactic Sequence Mediation	Time Total: 200 min (5 lessons)
		<p style="text-align: center;">Pre-teaching</p> <p>Routine: Checking attendance, checking in with Ls, T posts the Essential Question on the board, Can Do's, and class agenda, etc.</p> <p>Participating: Warm up The teacher asks learners to name all the movies they can think of. (Usually, stop after about 20-30, but you can leave the list on the board during the activity) The class is then divided into groups of 4-5 members. Step 1: Students must describe a movie; they brainstorm about it using anything they want. For example, the director is George Lucas, and the main actors are Mark Hamil and Harrison Ford.</p> <p>Step 2: Groups take turns to go in front of the class to role-play or imitate lines that the characters from the movie would say, ie: "I am your father Luke," or "I'm gonna kill Darth Vader for killing Obi Wan Kenobi" etc. In other words, they can only say character names, places in the movie, etc. The class collects 4-5 pieces of information and then starts to guess which movie it is.</p> <p>Optional: Students cannot talk. They must act out a scene from the movie without talking. For example, act out the lightsaber fight using two pencils.</p> <p>Engaging : Activation of prior knowledge Learners watch the video '73 Questions With Rosie Huntington-Whiteley Vogue' https://www.youtube.com/watch?v=6sSQZw6G2yA&list=PLztAHXmIMZFRBzyTy_w8r15g3OrNb36r6&index=2&t=163s . Learners watch the first 90 seconds of the video, so they get familiar with the format. After this intro, learners are asked to predict what kind of questions might be asked to the model.</p> <p>Learners watch the video again and this time they have to write down 7 answers they hear in the video. Learners are reminded that they don't need to remember and understand all the questions and answers.</p>	

(Those Vogue videos are a bit long so it's up to you whether you want to play the whole video or just a few minutes)

After watching the video, the teacher asks: "What did the girl answer? The class is divided into groups of three and each group brainstorms the answers they heard. They share their information with the whole class, and the teacher writes the answers on the board.

Introducing

Using the answers the learners wrote, the teacher explains the use of reported speech to report what a person said. First, the teacher explains the distinction between direct speech and reported speech. (Info taken from https://www.myenglishpages.com/site_php_files/grammar-lesson-reported-speech.php)

Direct speech	Reported speech
She says: "I like tuna fish."	She says that she likes tuna fish.
She said: "I'm visiting Paris next weekend"	She said that she was visiting Paris the following weekend.

A. Reporting Statements

When transforming statements, check whether you have to change:

1- Pronouns

In reported speech, you often have to change the pronoun depending on who says what.

Example:

She says, "My dad likes roast chicken." – She says that her dad likes roast chicken.

2- Tenses

- **If the sentence starts in the present, there is no backshift of tenses in reported speech.**

- **If the sentence starts in the past, there is often backshift of tenses in reported speech.**

	Direct speech	Reported speech
(no backshift)	"I write poems."	He says that he writes poems.
(backshift)	"I write poems."	He <i>said</i> that he wrote poems.

No backshift

Do not change the tense if the introductory clause is in a present tense (e. g. *He says*). Note, however, that you might have to change the form of the present tense verb (3rd person singular).

Example:

He says, "I write poems." – He says that he writes English.

Backshift

You must change the tense if the introductory clause is in a past tense (e. g. *He said*).

Example:

He said, "I am happy." – He said that he was happy.

Examples of the main changes in tense:

Direct Speech	Reported Speech
Simple Present He said: "I am happy"	Simple Past He said that he was happy
Present Progressive He said: "I'm looking for my keys"	Past Progressive He said that he was looking for his keys

Let's Practice

Instructions: Read a part of an interview with a fictitious book writer, Joe Harrplayer. Next, fill in the table below the text.

David: Tell us what made you begin your writing career.

Joe: I was in my last year at the university when I realized I didn't really know what I wanted to do with my life. At that time, my best friend told me that he liked reading my blog and I should try writing something longer. So I did, and that's how my first book came into existence. : We should thank your best friend, then. Personally, I believe that you are a master at storytelling! Where do you get inspiration from?

J: That's funny! My wife asked me where I got all the ideas from the day before. To be honest, I don't how it works. It just happens - sometimes out of nowhere.

D: What's your next move and when can we expect your next book?

J: Well, I'm planning to start a new book tomorrow! Just kidding. I say that all the time, but my busy schedule makes it impossible. I can tell you that I came up with a great story last summer. So I know what I want to write and I promise that I will start writing this year.

D: Thanks for talking and good luck with your new project.

J: Thanks for having me. You don't realize it but you've just made my father's dream come true. He said once that he'd always dreamt of seeing me in this show!

T writes some clue words on the board; characteristics and production names. T also shares his own film and TV program preferences.</p> <p>Engaging: Activation T writes on the board the question <i>What do you think of this film?</i> Ls get in groups of four then T shows pictures (whether on flashcards, a powerpoint presentation or a handout) with posters of at least six known TV series and/or films. Ls share their opinion of the films by using simple characteristics. Later, T elicits students to share their opinions with the rest of the class.</p> <p>Introducing</p> <p>T selects two film titles from the previous activity (or two different movies or TV series) to make a comparison of both. T introduces the phrases for organizing, and the intensifiers in phrases like “These two films are really quite different because...”, “the most important difference of those films is that...” and “This character is very similar to the other one...” One of the few similarities (or differences) is that there is too much action.</p> <ul style="list-style-type: none"> - The most striking /obvious / apparent / important characteristic is that this film is very old - The main difference is that this is a new film. - An additional / subtle similarity is that the movie is a low budget production. 	

<p>L1. Recognizes the main points of even a relatively long discussion on familiar topic, related to stories on standard English</p> <p>R1. Discriminates factual information from texts and simple reports on familiar topics.</p>	<p>L1. Understands the main points of a relatively long discussion on a familiar topic, related to stories in standard English</p>	<p style="text-align: center;">Oral Comprehension:</p> <p>Pre-listening Ls get a handout with synonyms of vocabulary then Ls write the number of the matching synonym on the column of numbers. Ls do it based on either their previous knowledge or word meaning in context. These words will be used throughout the exercise. The vocabulary includes <i>old, curse, violence, best, issues, budget, character, plot, and effects</i>. Later, t and Ls check the outcomes.</p> <p>Listening for the first time Ls listen to the audio “Old Movies” for the first time https://drive.google.com/open?id=1MysND3aCUSgx0_OAmtB4hk0RjzKtrD5l . T writes these three questions on the board: “Who are the speakers?”, “What are they talking about?” “How old do you think the speakers are?”</p> <p>Pair/Group feedback Ls pair off and discuss those three questions. Then they share the outcomes with the rest of the class.</p> <p>Listening for the second time Still in pairs, Ls listen to the audio for the second time and check the sentences that correctly reflect what the speakers say, on a comparative chart.</p> <p>Post-listening Ls make a circle in the classroom or outside. T cuts some paper stripes with names of films, TV series, comics and books on them. T puts them in a plastic bag and asks two Ls pick up one paper each. Each L has to read the name on the paper and compare it with his/her mate’s title, orally by using adverbial phrases and phrases for organizing. T goes around with the bag asking two other people do the same on and on.</p>

<p>SI 1. Repeat what has been said and convey this information to another person.</p>	<p>R1. Understand specific factual text and simple reports on familiar topics (e.g. movie reviews, memes, interviews, tweets, posts, etc.)</p>	<p style="text-align: center;">Written Comprehension:</p> <p>Pre-reading: Ls participate in a Game Show exercise (trivia) about TV, films, comics and others. Ls get in groups of three or four; they get a handout with some pop culture questions that they read and discuss to choose the correct answer out of some options. The trivia includes vocabulary about the topic. During the activity Ls must reach the answer they think is right, based on previous knowledge, intuition or peer opinion; therefore, T makes clear that the main goal is to have fun. This can also be developed when using TICs through applications such as; <i>Edmodo, Kahoot, Classroom</i> and the likes.</p> <p>Reading for the first time T hands out a review film-page where Ls read three different short film reviews. They try to guess the name of the films based on the information read. Later, T tells the titles: #1 <i>Joker</i>, #2 <i>Wonder Woman</i> and #3 <i>Parasite</i>.</p> <p>Pair/Group feedback In pairs or groups, Ls classify sentences that reflect an arguable aspect in the reviews. . E.g.: <u><i>This film contains violence.</i></u></p> <p>Reading for the second time T writes on the board the question <i>What do you think this production should have had?</i> Then by using the same handout with the three short film reviews, Ls discuss what they think those productions must or should have had less and more; they take short notes or write simple sentences. Ls write a short solution to the problem by using the modal phrases in past “should/must have had more/less. Ls share their solutions with the rest of the class. E.g. L= “<i>It should have had less violent scenes</i>” Finally, T draws to columns on the board; with the words more and less, and T writes some words given by Ls on those columns.</p> <p>Post-reading</p>

Summarize simple text dealing with familiar subjects (e.g. , short stories, videos, blogs) and check written sentences to look for mistakes (subject-verb agreement, pronoun verb agreement, capitalization, indentation, commas, appropriate vocabulary and connecting ideas and required format) spelling and basic punctuation accurately enough to be followed most of the time.</p>	<p>SI1. Repeating what has been and conveying this information to another person and talking in detail about tweets, films, memes, short stories, posts, and blogs.</p>	<p>T asks Ls to check the current movie listings on their cellphones; select one and write a short description /review in a form of a 5-line chat message. Then send it to one of their mates in the class through <i>WhatsApp</i> or <i>Facebook</i>. (If Ls do not have access to these tools; they write it on a sheet of paper). The description includes:</p> <ul style="list-style-type: none"> - Name of the film - Type - Some characteristics - An opinion of what should/must have had more/less <p>At the end, some volunteers read the messages to the rest of the class. * Spelling is not evaluated.</p> <p style="text-align: center;">Spoken Interaction</p> <p>Planning and organizing: T shows a “frozen” image of a short film entitled “Snack Attack”* that Ls will watch soon. Ls’ opinions are elicited through questions like: “What do you think is this short film about?” “Who do you think is the main character?” “How many characters do you think it has?” “What origin do you think it has?”, and others.</p> <p><i>*T can use any other animated short film</i></p> <p>Rehearsing For an information gap activity, T asks Ls to pair off and get a handout with list of sentences about visual productions and their characteristics for both participants. L 1 utters and L 2 completes them orally, with any words that come up to their minds spontaneously. then Ls swap roles. <i>Example:</i> Student 1: “<i>El Chavo contains a lot of ...</i>” Student 2 “<i>violence</i>”, “<i>funny moments</i>”, “<i>comedy</i>”, etc. Ls take notes on what his/her classmate said.</p> <p>Interacting/Describing Two pairs sit together. Each learner reports to the other what his/her classmate said during the info-gap activity. Some volunteers report to the whole class.</p>

Spoken Interaction/Production

SP 1. Express personal opinions of a short story, films, TV series, blogs or, videos, sustaining a conversational exchange with a peer and describing about what is occurring in tweets, blogs, short stories, videos.

W1: Describe, review and summarize simple text dealing with

Planning

Ls watch the 4-minute animated short film “*Snack Attack*”. Ls pay attention and take brief notes (if they find it necessary). **Short Animated Film: *Snack Attack* YouTube**
https://youtu.be/38y_1EWIE9I

Organizing

Ls watch the short film a second time and T hands out a set of 8 event cards. Each card contains one or two sentences of events from the film. Ls discuss and rearrange the events into the correct order by numbering them. Later, Ls share the outcomes with the rest of the class.

Ls pair off or make groups to answer the questions below, orally; Ls share opinions among their peers,
Questions are written by T on the board or on a piece of paper.

What are some characteristics that define this film?

What should this film have had more/less?

How can you compare this short film with a TV series or a full-length movie?

What do you think about the film?

What's the moral of the story?

Rehearsing

Learners pair up. They practice describing the short film by using the questions as a guide.

Describing

Some volunteers share their description of the short film with the rest of the class.

Written Production

Pre writing:

Ls work on an associogram (list of lexical items and/or ideas that relate to a topic.); to generate vocabulary to be used.

familiar subjects (e.g. , short stories, videos, blogs) and check written sentences to look for mistakes (subject-verb agreement, pronoun, punctuation, vocabulary, spelling and coherent ideas).

Drafting:

During a controlled-composition task, and based on the associogram, T and Ls construct ten questions on the board for Ls to answer in a complete way.

- 1.What kind of films do you like?
- 2.And why?
- 3.When do you like to go to the movies?
- 4.Whom do you like to go with?
- 5.What's the title of the last film you watched? And
- 6.What type of film is it?
- 7.What did you like the most of the film (or the least)?
- 8.Why?
- 9.What should this film have had more (or less)?
- 10.How would you recommend this film?

In pairs, Ls eliminate the ten questions only and organize the relevant information in the answers. Ls notice how the information is fitting and goes from general to specific, comparing and reviewing a film in a basic but coherent way. Ls also pay attention to verb-subject agreement, spelling and orthography.

Then, in collaboration with their mates, Ls compiles all the answers into a solid paragraph by rewriting and linking them with some connectors if necessary. Ls re-read it to make sure it sounds logical, coherent and descriptive.

Revising:

The learners share their paragraph with another pair of students for peer-correction. To do so, the following checklist is used:

	Great job!	Needs a little of work	Comments
Is punctuation correct?			
Are all the words spelled correctly?			
Is the vocabulary varied, interesting, and relevant to the film being reviewed?			
Does the review include the information requested?			
Are ideas written in a clear, logical sequence?			

Editing

Ls read the feedback provided by their peers and edit the paragraph.

Publishing

Ls publish their written reviews by pasting them on a mural entitled: Film Reviews. Ls take time to walk around and read their peer's film review.

Integrated Mini-Project		Time
<p>Acting out/ Completing MP: In the same pairs and continuing with the project guide for weeks 1, 2 and 3, learners share their summary with another pair of students to get feedback. Then, they edit and correct the summary, considering their peers suggestions.</p> <p>Responding and sharing: Learners share the summary of the movie they wrote. To do so, the teacher creates a blog where learners post their papers and their classmates respond to them.</p> <p>Learners participate in individual and peer assessment of mini-project.</p> <p>Teachers monitor</p> <ul style="list-style-type: none"> ▪ Did Ls use English during all aspects of Integrated Mini-Project? ▪ How did project presentations reflect understanding and/or mastery of Can Do statements? ▪ Did Ls put into practice the focus of Learn to Be and Live in Community? <p>Did the Integrated Mini-Project provide answers to the Essential Question?</p>		<p>Adjust previous times listed above to allow 5 min each week. <p>This is a fictional story of a man struggling to find his way in Gotham's society. He works as a clown by day but he wants to be a stand-up comic at night. He discovered that his existence is cruel then he takes a bad decision. This film contains violence but it also has a lot of a psychological drama. You can love it or hate it.</p> <p>Positives: acting, plot, make up and visual effects.</p> <p>Negatives: occasionally it is a slow movie (sometimes boring), and it needs more supporting characters.</p>	<p>An Amazon princess who lives on an island occupied only by women. Until an event makes her go to the city and fight. This is a fictional story that contains lots of action and special effects, drama and love.</p> <p>Positives: acting, plot, great costumes, amazing scenarios and cool visual effects.</p> <p>Negatives: The rival's performance, sometimes it is boring because it's slow (sometimes boring), finally, it has many slow motion scenes.</p>	<p>Members of an unemployed family target a wealthy household to survive. This is a well-written, horribly fascinating comedy-drama.</p> <p>Parasite is a black comedy, a movie about status aspiration, materialism, the patriarchal family unit and the satiric idea of having servants.</p> <p>Positives: acting, plot, reflects perfectly the Korean society.</p> <p>Negatives: inability to contend with society; it is a conservative film in some moments.</p>

Each group forms a circle. The ball (soft one) is thrown into the air and each player passes it to another by striking the ball upwards with the palm of the hand. As they hit the ball, they call the letters of the alphabet. Basic rules are: No hitting the ball twice in a turn. Ball should never touch the ground. If the ball touches the ground, the alphabet starts over. The first group to finish calling the alphabet wins. 		<p>Teacher projects/writes some example sentences describing people, places, feelings, emotions and attitudes. Teacher will join two different sentences by using contrasting words such as even though, on the other hand, although and however. Example: Even though the day was beautiful, we could not swim in the ocean because the waves were really rough.</p> <p>Planning The teacher explains the task. Pairwork. You just arrived from your trip to the Boruca site. You learned a lot about them. You have a conversation with a friend in which you tell them everything you remember about it. (Let students use the video: Festival of the Little Devils as their resource and ask them to use the contrasting words to report.)</p> <p>Organizing In pairs, students organize their conversation including the requested information and structure studied.</p> <p>Rehearsing Students take some time to practice the conversation until they have mastered its content and organization and both have switched roles.</p> <p>Interacting/Describing Pairs can also call the teacher to their places when ready and perform for him/her. Some students can go to the front to perform for their classmates.</p> <p>Phonology Review Diphthongs</p>

		<p>Each student is given a copy of a chart (see APPENDIX 12 - Answer Key on APPENDIX 13). T. posts different sentences on the wall (see APPENDIX 14). Ss work in pairs. They walk around the classroom. They read each sentence out loud and identify the word that belongs to any of the diphthongs in the chart. They have to make sure that the number of the sentence corresponds to the number in the chart. Once they finish, they compare their answers with another pair. T. checks their answers orally.</p>	
Integrated Mini-Project			Time
<p>Allow time for the Integrated Mini-Project each week. NOTE: All phases of the Integrated Mini-Project should be opportunities for Ls to practice English, not just those related to presentation.</p> <p>Participating to negotiate: (5 or 10 minutes in week 1 or 2)</p> <p>Option 1 Make up a festivity that celebrates a particular event worth remembering. It may be something in the community, at school or even in the classroom. What is it? How do people celebrate it? What does it represent or mean?</p> <p>Option 2 Look for information about cliques, subcultures and cultural norms that you consider interesting. Make a list of them (2 of each). Describe them. Express your opinions in relation to them what things you agree and disagree with of those cliques, subcultures and cultural norms.</p> <p>Option 3 In a small group, explore the culture, subculture and cultural norms that every member has. Describe them. Explain how those ideas make interactions easier or harder. Express which ideas you agree or disagree with from your culture, subculture and cultural norms.</p>			<p>Adjust previous times listed above to allow 5 min each week.</p> <p>Group presentations can be week 5 or 6.</p>

A Brief Introduction to the Indigenous Tribes of Costa Rica

JENN PARKER/ MAY 3, 2017

Before the arrival of the Spanish conquistadores, Costa Rica – like other countries in Central and South America – was entirely populated by indigenous tribes. Prior to 1502, between 400,000 and 500,000 native people lived in Costa Rica in distinct cultural groups, spread out throughout the country. It is thought that at one point there were as many as 25 tribes.

The first tribes to settle in Costa Rica were hunters and gatherers. As time passed, and experience and knowledge of the land, plants, and animals developed, tribes became more organized, civilized, and sophisticated. Groups became more permanently based and stable communities were formed. It wasn't until the Spanish conquistadors arrived that many of the tribes retreated to the deep jungles of Costa Rica for safety.

Tribes of Macro-Chibcha ethnic origin

There are five tribes that have been traced back to Macro-Chibcha origin, which is mainly from the northern region of South America, including the Amazon. The Guaymíes, Cabécares, Bribris, Térrabas, and Borucas tribes all emigrated to Costa Rica from the south. Today these tribes are still present in Costa Rica, but in much smaller numbers. Unfortunately, many of the indigenous people were run out of their territories, enslaved, or died from foreign diseases.

Borucas tribe

Asesoría Nacional de Inglés

The indigenous Borucas people of Costa Rica are still deeply rooted to their ancestral traditions. They are well known for their annual Fiesta de los Diablitos, which is a festival to celebrate their resistance and cultural survival against the conquistadores. During the festival, a performance of the devils (the Indians) versus the bull (the Spanish conquistadores) is staged. The Borucas make beautiful and detailed wooden masks for the festival.

Cabécares tribe

There are around 10,000 members of the Cabécares tribe still present in Costa Rica. The tribe continues to speak their native language and practice their traditional medicine and way of life. The cacique (the chief) of the tribe is permitted to marry several wives, as this tribe is a patrimonial culture. This tight-knit tribe are proud farmers of cocoa, coffee, and bananas, as well as fishermen and bird hunters.

Tribes of the Mesoamerican ethnic origin

There are three tribes in Costa Rica that are of Mesoamerican descent. The Huetares, Chorotegas, and Guatusos or Malekus tribes all traveled to Costa Rica from the north. These tribes were traced back to indigenous groups from Mexico and Guatemala, such as the Mayans and Aztecs.

Chorotegas tribe

The Chorotegas are the largest and most developed tribal group in Costa Rica. They are excellent farmers and produce crops such as cotton, cacao, corn, and beans. They are also well known for their ceramics. Typically, the women are the artisans and they create beautiful pieces that depict native animals of Costa Rica, like the jaguar and crocodile.

Guatusos tribe

This tribe, sometimes also called the Malekus tribe, are one of the smallest indigenous tribes in Costa Rica. Unfortunately, the majority of their land no longer belongs to them. There is also a very high rate of unemployment and inter-cultural mingling. They still make traditional ceramics and art, and also grow crops and keep bees. One thing that the tribe is trying to hold on to is their native language. In Guatusos schools, both Spanish and Maleku are taught to students.

<p>W.1. writes completing specific graphic organizers and sentence frames aimed at monitoring comprehension.</p>	<p>W.1 express what has been learned, how it has been learned, and learning goals for the future related to cultural diversity.</p>	<p>Teacher walks around the classroom and looks at students' answers. Then, he/she writes/pastes/projects the answers on the board.</p> <p>Post-reading</p> <p>Pair work. One of the two students states an opinion using information from the article, and the other says something to agree or disagree with what was said. Switch roles. <u>Stating your opinion:</u> I think... I believe.... I feel....In my opinion <u>Agreeing:</u> I agree with you./That's so true./ That's exactly how I feel. <u>Disagreeing:</u> You may have a point there; however, I think.../I don't think so./ I'm afraid I disagree. Example: A: I think that we we are not defined by one single preference. B: That's true. We can like things from different subcultures. We are diverse.</p> <p>Pre-writing</p> <p>Teacher projects/writes the following headings on the board: What I Have Learned this Week / How I Have Learned It / What I would like to learn in the future. Teacher asks students to think about the different headings. After a few minutes, he/she asks them to share ideas with a partner orally. Finally, the teacher asks for three volunteers to share one idea per heading, and the teacher proceeds to write them down on the board just to set an example. Teacher uses complete sentences to do so.</p> <p>Teacher distributes copy on Appendix 7 and shares the task with the students. The school is going to organize a round table about diversity and culture and your teacher has selected you as a representative of your group. Your teacher gives you a graphic organizer to help you write down your ideas. Fill in the organizer.</p> <p>Drafting</p> <p>Students will write down their ideas for every heading in their notebooks or on a piece of paper. Teacher clarifies that they have to use complete sentences.</p>	
--	---	--	--

		<p>Revising Students check if all important ideas were included. They go over grammar, spelling, punctuation, etc.</p> <p>Editing & Publishing Students go over spelling, grammar, punctuation, capitalization and word choice. They can use their cell phone, a dictionary and/or ask a partner. After that, they proceed to fill in the graphic organizer.</p> <p>Phonology Review</p> <p>The teacher copies the words from a set of minimal pairs on board. Students drill them. After that, teacher asks students to pick seven words from the board and write them down in their notebooks. Students should read their words either to the class or to a partner. The listeners should write down the words they hear. After the words have been given and repeated (if necessary), the listeners compare their lists with the original list. The teacher can also write her/his own list of perceived words on the board to compare with the student's list. (The words in bold are words taken from the material provided in this week)</p> <p>fit feet fun fan been bean most must share chair food foot customs costumes</p> <p>T. can also read sentences to students so that they identify the words. They write down the words they hear in order. A fan had fun during the concert. A bean has been planted. Food fell on my foot. My feet don't fit in these shoes.</p>

Pop Culture, Subculture, and Cultural Change

It may seem obvious that there are a multitude of cultural differences between societies in the world. After all, we can easily see that people vary from one society to the next. It's natural that a young woman from rural Kenya would have a very different view of the world from an elderly man in Mumbai—one of the most populated cities in the world. Additionally, each culture has its own internal variations. Sometimes the differences between cultures are not nearly as large as the differences inside cultures.

High Culture and Popular Culture

Sociologists use the term high culture to describe the pattern of cultural experiences and attitudes that exist in the highest class segments of a society. People often associate high culture with intellectualism, political power, and prestige. In America, high culture also tends to be associated with wealth. Events considered high culture can be expensive and formal—attending a ballet, seeing a play, or listening to a live symphony performance.

The term popular culture refers to the pattern of cultural experiences and attitudes that exist in mainstream society. Popular culture events might include a parade, a baseball game, or the season finale of a television show. Rock and pop music—“pop” is short for “popular”—are part of popular culture. Popular culture is often expressed and spread via commercial media such as radio, television, movies, the music industry, publishers, and corporate-run websites. Unlike high culture, popular culture is known and accessible to most people. You can share a discussion of favorite football teams with a new coworker or comment on American Idol when making small talk in line at the grocery store.

Subculture and Counterculture

A subculture is just what it sounds like—a smaller cultural group within a larger culture; people of a subculture are part of the larger culture but also share a specific identity within a smaller group.

Thousands of subcultures exist within the United States. Ethnic and racial groups share the language, food, and customs of their heritage. Other subcultures are united by shared experiences. Biker culture revolves around a dedication to motorcycles. Some subcultures are formed by members who possess traits or preferences that differ from the majority of a society's population. The body modification community embraces aesthetic additions to the

human body, such as tattoos, piercings, and certain forms of plastic surgery. In the United States, adolescents often form subcultures to develop a shared youth identity. But even as members of a subculture band together, they still identify with and participate in the larger society.

Examples of Subcultures in the USA

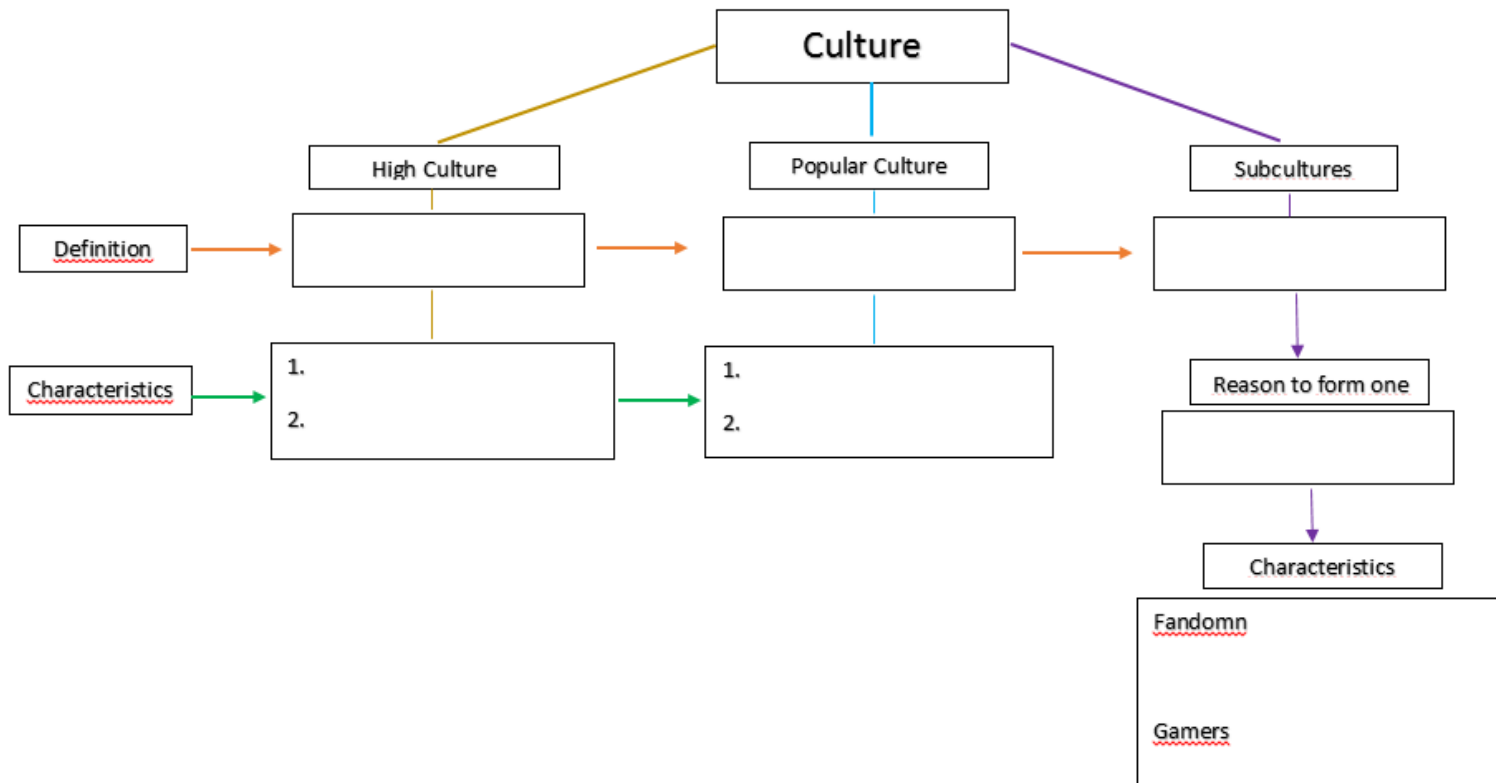

Fandom is characterized by people who are somewhat obsessed or closely identify with certain characters or fictional worlds, though a “fandom” can be built around any shared interest. Fans have Conventions (cons), dress up as said characters (called cosplaying), and form little individual communities around a particular fandom, such as Doctor Who, Harry Potter, or any Anime ever.

Gamer culture in America represents the more devoted fans and players of what has become one of the largest entertainment industries in the US. Many people in the US play video games of some form (when you realize Candy Crush and The Sims count), and in 2014, more people watched the live League of Legends World Championships than the deciding game of the NBA finals.

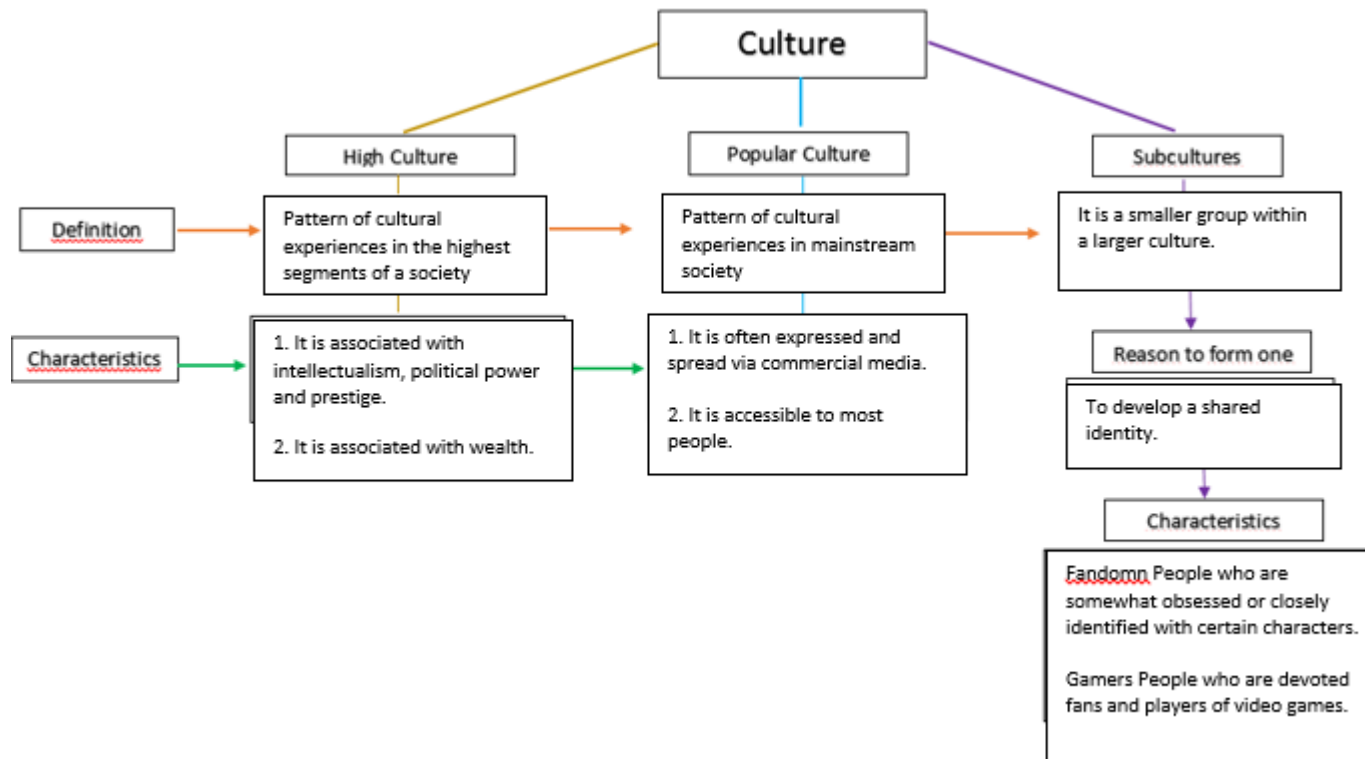

Sports – from watching games as a die hard fan to being the soccer mom who drives to all the games – are an important and defining part of American society. For people who consider sports a large part of their lives, well, they just operate on different seasons and speak a different language than those who don't. Even non-sports fans tune into the Superbowl in the US every year as it's become such a pervasive part of the entertainment industry.

Assessment Strategies & indicators of learning* (Diagnostic, formative, summative)	Learner can	Didactic Sequence Mediation	Time Total: 120 min (3 lessons)
		<p style="text-align: center;">Pre-teaching</p> <p>Routine: Checking attendance, checking in with Ls, T posts the Essential Question on the board, Can Do's, and class agenda, etc.</p> <p>Participating: Warm-up Before class, the teacher prints and cuts out at least two identical sets of pictures from APPENDIX 1. The pictures show a wide variety of diverse people. The class divides into 2-4 groups and each group receives one identical set of pictures. Each group's goal is to sort their set of pictures into 4 groups of similar people. This could be done by placing the pictures on four corners of a piece of poster paper and writing a title next to each group. While sorting the pictures, students can practice using modal verbs (e.g. This picture should go here because... This group might be people who...).</p> <p>Although each group of students has the same pictures as the other group, they will probably sort the pictures in different ways. For example, one group of students might sort the pictures by gender and age. Another group might sort the pictures by race or ethnicity. Once the students have had time to sort their pictures, the teacher should help the students compare their work. How did they sort people differently? Why did they do it that way? The objective of the reflection is to help students see that each person has more than one identity (gender, race, age, nationality, religion, etc.) that makes them both similar to and different from other people.</p> <p>Engaging: Activation of prior knowledge Teacher instructs students to list the identities of a person they admire (i.e. that person's nationality, race, gender, language, ethnicity, sexual orientation, profession, disability, clique, religion, subculture, etc.).</p>	

<p>SI.2 expresses opinions about cultural identity and diversity</p>	<p>SI.2 express opinions about cultural identity and diversity</p>	<p>Then, the Teacher hands out a blank Venn Diagram (APPENDIX 2.1). Students should write the person’s name in the middle section, then label each of the circles in the diagram with one of the person’s identities. Students then get in partners and try to fill all of the other sections of the diagrams with other people’s names (See APPENDIX 2.2 for an example of a completed diagram).</p> <p>Introducing Teacher introduces the idiom “Seek first to understand, then to be understood.” They then ask students what they think it means. They clarify any misunderstandings. The idiom means that you should listen to other people first and try to understand them before trying to tell them about yourself. Teacher asks students <u>why</u> it is better to listen first, before speaking about themselves. The teacher explains to students that today they are going to practice listening to other people and “seeking to understand” how they are the same and different, compared to us.</p> <p>Planning/Organizing The teacher instructs students to list some of the aspects of their own identity (for example, gender: male). (See APPENDIX 3 for an illustration of aspects of identity.) Students do not need to list every single part of their identity, but they should write as many as they feel comfortable talking about. Once they have a list of several parts of their identity, students should note down some benefits and challenges of having that identity.</p> <p>Rehearsing Students get into partner pairs. One student tells the other about one of their identities (e.g. I am a girl.) and one benefit and one challenge of having that identity (e.g. On one hand, boys sometimes do nice things for me, like holding doors. On the other hand, some people think that I can’t do everything that a boy can do.). The other student listens carefully, then summarizes or asks questions (e.g. “So even though boys sometimes do things for girls, other people don’t think girls can do what they want?”).</p> <p>Once the first person has shared part of their identity and the other person has asked questions, the two students switch roles. The listener starts talking about their own identity and the speaker listens carefully and asks questions.</p> <p>Interacting/Describing Teacher reminds students that today they are practicing listening for understanding. In this activity, they will show their understanding by summarizing what their partner says to a third person.</p>

The speaker tells the listener about their own identity and its benefits/challenges. Then the listener tells the observer about the speaker. If the listener makes doesn't remember correctly, the speaker can correct her (e.g. Well, not really. Actually, I...). The observer can ask the listener questions to get more information. Finally, the students switch roles--the listener becomes the speaker, the speaker becomes the observer, and the observer becomes the listener. This process is repeated until all three students have had a chance to try all three roles.</p> <p>Planning The teacher divides students into small groups and gives each group just one of the three stories about migrants' experiences living in the US (APPENDIX 4). Each group reads its own story and discusses these three questions with their partners:</p> <ol style="list-style-type: none"> 1) What was the cultural norm in this person's own country? 2) What was the cultural norm in the US? 3) How did cultural differences affect this person? <p>The teacher then chooses certain groups to share their text and what they learned. Ideally, each text should be shared one time with the whole class.</p> <p>Organizing The teacher explains that this lesson is about cultural norms and cultural "storms" or conflicts. The teacher asks students to share some of the norms of their own cultures (e.g. In my culture, people almost never wear shorts! In my culture, you have to eat the food you're given, even if you are not hungry!).</p>

<p>SP.3 explains points of view, justifying assumptions and plans briefly.</p>	<p>pose further question without having to pause very long to formulate the question.</p> <p>SP.3 explain and justify, briefly, points of view, assumptions, and plans.</p> <p>W.1 write a simple, short descriptive</p>	<p>Once the class has discussed a few cultural norms together, the teacher asks students to jot down notes about one time they experienced a cultural “storm,” or conflict--when their subculture or their personality did not fit well with the cultural norms of the community.</p> <p>Rehearsing Teacher tells students that today they have an opportunity to show empathy for other people with diverse experiences and use open communication to understand each other better.</p> <p>Learners imagine that they are TV journalists, doing interviews for a show called “Seeing Eye to Eye.” Teacher asks students what they think that phrase means. Once students are clear on the meaning of the expression, the teacher explains the subject of the interviews. Students should ask their classmates for their opinions on their own cultures and subcultures. Below are three main questions they should be sure to answer:</p> <ol style="list-style-type: none"> 1) What subculture(s) are you a part of? 2) How are the norms of your subculture other than the norms in other cultures? 3) What is your point of view (opinion) on these differences? <p>The best interviewers will ask further questions to understand more about their classmates. The best interviewees will explain and justify their answers. Why do they think that? What assumptions are they making? How do they plan to deal with these differences in the future?</p> <p>Producing Certain pairs of students come forward to demonstrate their interviews in front of the class. The class listens, then writes follow up questions in their notes. The teacher selects a few of these follow up questions for students to ask the interviewee.</p>	
---	--	---	--

<p>W.1 writes a simple, short descriptive narrative paragraph based on real or imagined event related to cultural diversity, including characters, plot, and setting.</p>	<p>narrative paragraph of personal experiences on cultural diversity, without using an aid such as a dictionary, and check it to look for mistakes (subject-verb agreement, pronoun and article agreement, capitalization, using commas, sentence sense, word order, text structure, concrete ideas, spelling and basic punctuation, etc.).</p>	<p>Pre-writing So far this week, students have explored their identities and cultural experiences. They have gotten lots of chances to talk and ask questions about those things. Today their task will be to write one of their experiences down in a narrative paragraph. The teacher should explain this at the beginning of the lesson, and display this prompt on the board:</p> <p>“Write a narrative paragraph. The paragraph should tell the story of a time when you experienced a cultural ‘storm’ or conflict.”</p> <p>To prepare for writing, the teacher reviews the prompt and reminds the students what a narrative paragraph is. It is a paragraph that tells a story. Then, the Teacher and students review the “Story Mountain” model of narrative (APPENDIX 5).</p> <p>The teacher gives students a copy of the “Story Mountain” with blank spaces (APPENDIX 6). Students write a few words next to each part of the mountain, to help plan their stories of cultural conflict. A completed example can be found in APPENDIX 6.1.</p> <p>Drafting The teacher now challenges the students. Students write their own narrative paragraph. Students may not use a dictionary or other aid, except for their “story mountain” plans. An example of a student’s completed narrative paragraph can be found in APPENDIX 6.2.</p> <p>Revising Students get into pairs to read each other’s stories and give feedback. They may use the feedback guide in APPENDIX 7. Students check that their partner’s story has all of the parts of the story mountain. They can recommend that their partners elaborate (add on) to parts of their stories.</p> <p>Once they have received feedback from their partners, students take time to make changes to their writing.</p> <p>Editing</p>	
--	---	---	--

		<p>Once revisions have been made, students switch to a new partner. The new partners trade papers and check for mistakes in grammar, spelling, conventions, etc. Students correct their own errors based on their partners' feedback. During this time, the teacher walks around the room, helping students correct their mistakes.</p> <p>Publishing Some students come to the front and read their stories aloud. After each story is read, the other students in the class turn and talk with their partner. The pairs of students tell each other what the cultural conflict in the story was and how the writer resolved the problem.</p> <p>Phonology Review Monotonous vs. natural and interesting tone: Students can watch the video: https://www.youtube.com/watch?v=tzh3Owutf5Y Teacher asks students to listen to two audios. They are the same text, but they have different intonation. Students choose the one that is monotonous and the one that sounds more natural and interesting. Then, they are given the text. They work in pairs and they take turns reading it.</p>

APPENDIX 4: Stories of immigrants to the US. Only give *one* story to each group of students.

1 When I came to the US, I noticed that our **cultures** are very different. For example, when I had a party in Mexico, I didn't really notice if the music bothered our neighbors. In the US, people think that's **insensitive**. Today I have learned that I have to respect others so they can respect me.

-- Alicia, immigrant from Mexico to the US

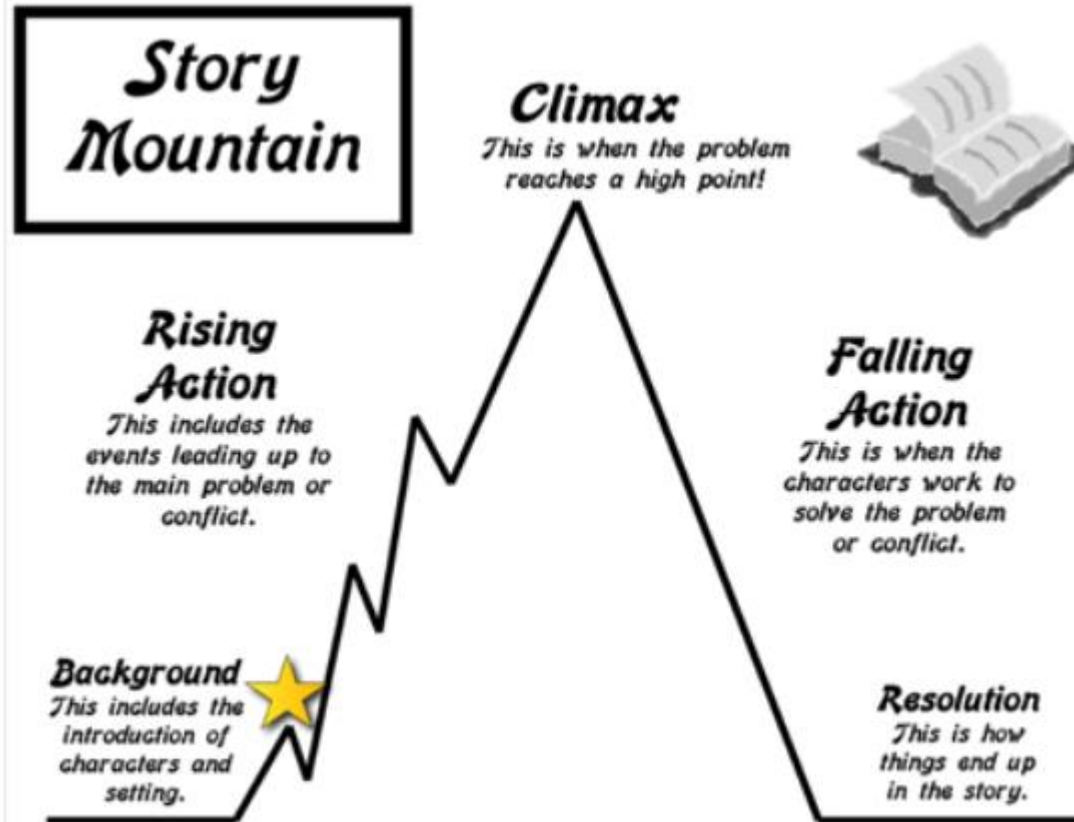

2 One thing that is different for us is the food and the time to eat. Usually we have dinner at noon and a small snack in the evening. Some Americans eat a lot of fast food but we try to keep our **customs** and eat our **ethnic** food. It's hard, though, because we can't find the ingredients we need, and if we find them, they are expensive. I know that we should enjoy the **cultural** differences, though, because they will help us grow.

-- Yolanda, immigrant from Cuba to the US

3 In American **society**, people welcome you to a new neighborhood and say hello even though they don't know you. In Chile when you don't know the person very well, they look at you in a funny way. I remembered a time when I said hello to several people in Chile, just to see if they would say it back. Only a few responded.

I am a really good skateboarder. Ever since I was a kid, I was really into it. But I am also a good student at school. People don't think that skateboarders are very smart. One day, I heard my teacher asking some other students about sports. I didn't want him to ask me, because I knew he thought I was a great student. And then he asked me! I had to tell him that I skateboard. I was surprised, because the teacher said it was very creative and good exercise. Some of the other students thought so, too. Now I know that I can be a good student and a skateboarder!

Participating: Warm- up

The Teacher provides students with a list of vocabulary words and definitions associated with this week's theme (See **APPENDIX 1** for list of words with explanations and examples). Students look through the list briefly (this can be done in partners or individually), and the Teacher clarifies any questions the students may have.

Next, the students get into small groups (no larger than 4), and each group has a piece of paper and a marker. Students divide the paper into 6 equal sized sections by drawing horizontal lines, or by folding the paper, and then unfolding it to make 6 horizontal sections. (See images below for help folding.) These sections are labeled 1-6 on the front of the paper, and then 7-12 on the back.

<https://spaceforlivingos.com/2012/02/quick-and-easy-steps-to-creating-your-cleaning-schedule.html>

Once students' papers are prepared, with 6 horizontal sections on each side, the teacher presents the clue for the first vocab word (See **APPENDIX 2** for clues). The students' goal is to listen to the clue, then guess the correct word, and write it on their paper with a marker in section 1. Students should not let other groups see the word they wrote. Once all the students have had time to write an answer, the teacher says "Papers up in 3, 2, 1!" Students hold up their papers and the teacher can see their answers from the front of the room. The teacher tells students what the correct word was, and students draw a check next to the word in section 1 if they got it right.

This process is repeated with up to 12 vocabulary words. Students write each word in the next section of their paper, so that the teacher can easily read the answers from the front of the room.

Then students answer written questions about their opinions (also in APPENDIX 3).</p> <p>Once students have had time to fill out the forms giving their own, personal opinions, the teacher reviews the questions with the class, allowing students to express their opinions, as well as explain and justify why they see things that way.</p> <p>Introducing The Teacher introduces the idiom “You can’t judge a book by its cover.” The students discuss what it might mean. The teacher makes sure that by the end of the discussion, students know that the phrase means that you can’t judge what is inside of people based only on the way they look on the outside.</p> <p>The Teacher explains to students that this week they will consider appearances and their effect on how we see ourselves and others.</p> <p>Planning/prereading The teacher shows students pictures of Representative Ayanna Pressley (APPENDIX 4). They can read out loud, taking turns with their partners to practice their pronunciation. Alternatively, the teacher can ask students to read silently to emphasize deep understanding of the text.</p> <p>After reading, students work in partner pairs to answer the questions from APPENDIX 7. Some of these questions are on subject specific words (R.3), and others check students’ comprehension of the text.</p> <p>Pair/group feedback When students have finished filling out the questions, the teacher displays the correct answers on the board. The students check themselves and either draw a check next to their answer if it is right, or change their answer if it is wrong. The teacher can also choose 1 or 2 of the most important questions to review with the class, saying “Why did you pick that answer? How did you know? What did you see in the text that told you...?”.</p> <p>Reading for the second time Students read the text again. This time, they underline parts of the text that show how/why Ayanna’s hair was important to her.</p> <p>Post reading The Teacher then shows students the reflection questions (APPENDIX 8) one at a time. For each question, students first share their answer with the person sitting next to them, then raise their hands to take turns sharing their ideas with the class.</p> <p>Finally, students should write down a 1-2 sentence summary of what they have taken away from reading this article. (Examples: Appearance means different things to different people. OR Sometimes people who look different are really amazing. OR You shouldn’t judge people just by the way they look.)</p>

(For example, the message of their announcement might be “You can’t judge a book by its cover.”)</p> <p>To start planning, students receive a graphic organizer (APPENDIX 9) to complete, organizing their thoughts on the subject. The students fill out their own organizer independently.</p> <p>Organizing Students get into small groups (2-3 people) and share their responses to the graphic organizer. Together, they agree on what the most important lesson is and what reasons they should give. Students write a short script with parts for each student to say. The Teacher should circulate around the room, helping students develop their scripts and checking the quality of each script.</p> <p>Rehearsing Once their script is written, students rehearse presenting their public service announcements in the same groups.</p> <p>Producing Students perform their public service announcement for the class, or record them to show to actual middle school students.</p> <p>Pre-writing The teacher tells students that their objective today is to write a well - developed paragraph expressing what they have learned this month about cultural diversity, how they learned it, and what their learning goals are for the future.</p>

For example, when students see a picture of an indigenous mask, they might recall "Indigenous people are our people--they are Costa Rican!".</p> <p>Then students can fill out a "Knew, Learned, Want to Know" organizer (APPENDIX 11), summarizing their thoughts and knowledge.</p> <p>Drafting Students' job now is to write a well-developed paragraph that answers the prompt "Express what has been learned, how it has been learned, and learning goals for the future related to cultural diversity" (W.2). The teacher can give them a rubric to check for themselves whether they have answered all parts of the prompt (APPENDIX 12). To help the teacher, APPENDIX 13 is an example of a paragraph that a student might write, that answers all parts of the prompt.</p> <p>Revising Once students have had time to write and check themselves, they trade papers with their partners. Each student reads their partner's paragraph, then fills out a peer feedback rubric (APPENDIX 14). Then students trade back and make changes to their writing based on their partners' feedback.</p> <p>Editing Once students have had time to revise their writing, they trade papers with their partners again. This time, students check for grammatical and spelling errors. Students work together to fix these mistakes, while the Teacher circulates to help.</p> <p>Publishing Some students read their papers to the class. Listening students can raise their hands, after the paragraph has been read, to add on other things that they have learned or want to learn.</p> <p>Phonology</p>

Enduring Understanding Reflection

How well did the learners progress in their understanding of the Enduring Understanding?

Week Plan Self-Assessment

At the end of the week, T guides the learners to check their progress using the checklist below. (Can be translated into Spanish if needed to ensure Ls' understanding.)

<i>Learner Self-Assessment</i>			
<i>I can...</i>	Yes	In progress	No

*You must include the indicators of learning from the document “Guidelines on How to Write Indicators of Learning for the Pedagogical Mediation of the English Curriculum” under each Assessment Strategy and in the Self -Assessment chart at the end of every week.

APPENDIX 1:

List of vocabulary with explanations and examples

education level - the highest level of school or college that a person has attended.

examples: elementary school, middle school, high school, college, masters, doctorate

APPENDIX 5: Biography of Representative Ayanna Presley

Modified from wikipedia.org article

Ayanna Pressley was raised in Illinois. Her mother worked multiple jobs, while her father was incarcerated (in prison) for drug abuse. Ayanna attended Boston University, but left school before graduating to take care of her mother. Later, she moved to Boston. She became the first black woman to ever be elected to the Boston City Council. In 2018, Pressley was elected as the first woman of color to represent Massachusetts in Congress. There, she has fought for expanded medical benefits, lowering the voting age, and protections for victims of sexual violence.

APPENDIX 6: Newsela.com article on Representative Pressley's hair loss announcement.

Representative Ayanna Pressley shows her loss of hair from alopecia

By USA Today, adapted by Newsela.com.

1 Ayanna Pressley is a U.S. Democratic Representative of Massachusetts. On January 16, she revealed that she is bald. She has a condition called alopecia (pronounced: “al-oh-pee-shuh”), which causes hair loss. She explained why her "black hair story is both personal and political."

2 In a video posted online, Pressley noted how little girls connected with her braids. She said her hair is part of her image as a black woman. When her hair fell out, she felt like she participated in a "cultural betrayal."

Going Public

3 "I'm trying to find my way here, and I do believe going public will help," Pressley said. She showed her bald head. "This is my official public revealing. I am ready now because I want to be freed from the secret and the shame that that secret carries with it."

4 She added, "I am making peace with having alopecia. [...] I'm very early in my journey. But I'm making progress every day, and that's why I'm doing this today."

5 Pressley, who is 45 years old, represents parts of Boston and other communities in Massachusetts. In 2018, she became the state's first black woman elected to the U.S. House of Representatives.

6 While someone was working on her braids in fall 2019, she found out that she had some bald patches. It got worse quickly from there.

Fighting The Hair Loss

7 She said she started waking up to sink-fulls of hair. Pressley said she tried to fight the hair loss because she thought she could stop it. She tried wrapping her hair and wearing a bonnet at night, but nothing worked.

8 "I did not want the morning to come," she said. She feared that she would take off the wrap and "be met with more hair in the sink," Pressley said. She did not want to see in the mirror "a person who increasingly felt like a stranger" to her, she said.

Representative Ayanna Pressley speaks during an event in Boston, Massachusetts. Pressley said that when she got Senegalese twists in her hair, she felt like she met herself "fully for the first time." Photo: Getty Images

9 She said her last pieces of hair fell out the night before a big vote in December. Within hours, she needed to appear to cast her vote.

10 To her, losing her hair felt like losing an arm or leg, she said. However, she did not have time to think about it. "I knew the moment demanded that I stand in it," she said.

11 She left as soon as she could and hid in a bathroom stall. She felt ashamed.

Common Skin Disease

12 Alopecia is a common skin disease. It affects nearly 7 million people in the United States.

13 Pressley used to be a councilwoman for Boston. She has announced that she will run for a second term in Congress.

14 After she became an elected leader, Pressley said at first she wore wigs and hair extensions. Then she got long Senegalese twists about four or five years ago. The twists went down to her waist.

15 "I felt like I met myself fully for the first time. I sort of looked myself in the mirror and said, 'Oh, there I am.' And it felt good," she said.

Community Acceptance

16 She said she knew that her braid hairstyle would be seen by some as a statement. She said she was surprised by the acceptance of her community, especially from young girls and women.

17 Pressley said her twists had become a part of who she is and how she shows up in the world. They are also closely tied to her "political brand." This was why she wanted to be so open about her alopecia.

18 Pressley said she felt like she owed "all those little girls an explanation." Her husband insisted she did not owe an explanation. Pressley pushed back.

19 "The reality is I'm black and I'm a black woman and I'm a black woman in politics, and everything I do is political," she said.

APPENDIX 12: Self-check rubric to help students answer all parts of the writing prompt

Directions: Check if you have completed each goal in your writing. Then circle Yes, Partly, or No, depending on whether you have done it. If there are any objectives that are done partly, or not done, correct your essay, then change your answer to Yes.

Prompt: Express what has been learned, how it has been learned, and learning goals for the future related to cultural diversity			
My paragraph has a topic sentence.	Yes	Partly	No
I expressed several things that I learned about cultural diversity.	Yes	Partly	No
I described how I learned these things.	Yes	Partly	No
I explained what I still want to learn about cultural diversity.	Yes	Partly	No

APPENDIX 13: Example, for the teacher, of a paragraph that a student might write.

Prompt: Express what has been learned, how it has been learned, and learning goals for the future related to cultural diversity

Student Response:

In this unit, I have learned a lot about cultural diversity and understanding. First, I learned about the cultures of indigenous people in Costa Rica. I watched a video about a Boruca festival, and learned the meanings of their masks and performances. Next, I learned that every culture has its norms, and the differences between those norms sometimes cause “storms,” or conflicts. I discussed my culture’s norms and other people’s norms with my classmates. Finally, I learned that “you should not judge a book by its cover.” That means that you can’t tell what is inside someone based only on how they look on the outside. I read an article about a congresswoman in the US who lost all her hair. Her hair had been a big part of her identity, and it was important to her, but she was still the same amazing person after her hair fell out. I still don’t know very much about what people’s appearances mean to them. In the future, I want to learn more about why people decide to look the way they do. I also always want to learn more about people who look different from me and see what is on the inside of them--not what is on the outside.

Color coding:

APPENDIX 14: Peer feedback rubric for writing.

1)

Prompt: Express what has been learned, how it has been learned, and learning goals for the future related to cultural diversity			
My partner's paragraph has a topic sentence.	Yes	Partly	No
My partner expressed several things that they learned about cultural diversity.	Yes	Partly	No
My partner described how they learned these things.	Yes	Partly	No
My partner explained what they still want to learn about cultural diversity.	Yes	Partly	No

2) What is one thing your partner did well?

3) What part of the prompt can your partner explain more?

APPENDIX 15:

Past Tense: Inflectional –(e)d

Instructions:

Work in pairs. Each player rolls the die twice. The first time you roll the die is to know the row you will use and the second one is to know the column.

Identify the word that you will use in your corresponding turn. Then, say the word in past tense. If you say the inflectional –(e)d correctly, you get a point. At the end, the player that has more points wins the game.

Example:

Student A rolls the die; s/he gets  (row or horizontal line). S/he rolls the die again, and s/he gets  (column or vertical line). So, this means that s/he has to use the word “Incarcerated.”

Student A has to say “incarcerated.” If s/he pronounces the inflectional –(e)d correctly, s/he gets the point. Student B continues playing, and s/he follows the same steps.

		<p style="text-align: center;">Pre-teaching</p> <p>Routine: Checking attendance, checking in with Ls, T posts the Essential Question on the board, Can Do's, and class agenda, etc.</p> <p>Participating: Warm up Teacher shows students a series of mixed pictures. Some of them portray positive environmental practices (riding a bike, composting, using solar panels and recycling) and some others portray negative environmental practices (cutting down trees, using plastic bags, wasting water and flushing medications) (See APPENDIX 1). Students will work in pairs to classify positive and negative practices orally. Teacher will ask for volunteers to share their answers aloud.</p> <p>Engaging: Activation of prior knowledge Using the same pictures from the warm up activity, the teacher will ask students to write down the names of the different activities presented. The ones that they know. Students can add more negative or positive practices of their own.</p> <p>Introducing Teacher writes down the following questions on the board(projects them): How would you define sustainability? How do you know if something is sustainable?</p>	<p style="text-align: center;">5'</p> <p style="text-align: center;">5'</p> <p style="text-align: center;">5'</p>

<p>L.2. extracts the main points of audio texts.</p>	<p>L.2. follow the main idea of audio text about our sustainable world.</p>	<p>Which of the practices previously presented can be considered sustainable practices? Teacher asks them to answer those questions in pairs. Volunteers share their answers with the group. Teacher tells students that during this week, they will learn information related to those questions.</p> <p>Oral Comprehension Pre-listening Activation of schema. Teacher presents a picture of a sustainable practice (or acts it out). See (APPENDIX 2). The teacher tells them that it is a sustainable practice and asks them a couple of questions: What makes this practice sustainable? What other practices do you know about?</p> <p>Teacher introduces the goal for the lesson: L.2. follow the main idea of audio text about our sustainable world. Video for the task can be accessed at https://youtu.be/SS5ov8CCgDc (See APPENDIX 5 for the script)</p> <p>Teacher presents the key words using pictures that illustrate them. She/He includes a sentence in the presentation for every word. Teacher asks students to listen and to repeat the words and sentences. Students copy everything in their notebooks(gives them a copy). (See APPENDIX 3)</p> <p>Key words: needs, resources, available, exploited, maintain, decompose, forever, take up, environment, harms, avoid, fix NOTE: Teacher chooses 8 out of the 12 key words depending on what his/her students know.</p> <p>Clarifying: Teacher clarifies the meaning of the words by asking questions such as What is something that you can fix? How do you maintain the classroom in good condition? etc.</p> <p>Pairwork: Pictures are numbered, but they have no text this time. Every pair gets a copy with the sentences (or they can use the ones that they previously wrote in their notebook). One student at a time reads a sentence at random, and the other student tells the number of the picture on the board that represents the sentence. What is sustainability? A) Protecting the environment for future generations. (Correct answer) B) The total number of resources to exploit on Earth. C) Actions that you can only do for a short period of time.</p> <p>2. What question can we ask ourselves to know if our actions are sustainable? A) What is sustainability? B) What happens with plastic after we use it? C) Can I do this forever? (Correct answer)</p> <p>3. Which of these actions is NOT mentioned in the video? A) Carpooling (Correct answer) B) Avoiding plastic bags C) Implementing the 3 R's</p> <p>4. What do you need to ask yourself before buying a product? A) Do I really need to shop this? Then, teacher checks them orally with the group.</p> <p>Post-listening:</p> <p>Pairwork: Production. Briefly, tell your partner what you learned about sustainability (concept and possible practices). You can use Sustainability means/is.... Some things that we can/should do...</p> <p>Oral Comprehension Pre-listening Activation of schema: Teacher directs a quick review of key words and concepts from the previous listening exercise. Teacher shows a picture of a footprint (See APPENDIX 6). Teacher asks students: What do you see here? How is it produced? Have you heard of the term <i>carbon footprint</i>? What do you think it is? Teacher listens to students as they give their answers, and s/he shares with them the following definition: Carbon footprint <i>is a mark you leave upon the environment. It is related to harmful gases and the use of energy.</i> (Definition adapted from: https://youtu.be/8q7_aV8eLUE - Teacher can use this video as a personal reference to talk to her/his students about the topic.) This is another definition:</p>	<p>5'</p> <p>5'</p>
---	---	---	---------------------

		<p>Carbon Footprint</p> <p>A carbon footprint is the amount of greenhouse gas emissions caused by an organisation, event, product or person. Usually a carbon footprint is calculated for a year.</p> <p>You can think of your carbon footprint as a measure of your impact on the environment. Having a small carbon footprint is better than having a large one, and a good goal is becoming what is known as <i>carbon neutral</i>. That's when the combination of all your activities releases the same amount of CO2 as they absorb. When you are carbon neutral, your carbon footprint is zero.</p> <p>Taken from: https://www.naturalresources.sa.gov.au/files/sharedassets/sa_murray-darling_basin/education/teaching_resources/climate_change/carbon-footprint-game-teacher-resource-pack-gen.pdf</p> <p>Teacher asks students the following question. : Do you think that what we eat has a carbon footprint? Why? How?</p> <p>Teacher introduces the goal of the lesson: Understand the main points(ideas) in a conversation about an environmental topic.</p> <p>Teacher presents the key words by giving students a strip of paper with some questions related to the key words. (See APPENDIX 7). The teacher reads the questions aloud and repeats the key word at the end of the question for the students to listen and repeat.</p> <p>Key words: contain, reduce, vegan, greenhouse, requires, open field, grown, halve</p> <p>Teacher points at a word at a time and students pronounce it.</p> <p>Clarifying. Now, the teacher gives students time to answer the questions individually first. Pairwork. Students quiz each other by asking the same questions to the partner. The student who is answering the question cannot see her/his copy. Then, they share the answers with the group. As they go over the questions, the teacher shows them possible answers on the board and a picture illustrating the concept. (See APPENDIX 8).</p>	<p>5'</p> <p>5'</p> <p>10'</p> <p>5'</p>

Integrated Mini-Project			Time
<p>Allow time for the Mini-Project each week. NOTE: All phases of the Integrated Mini-Project should be opportunities for Ls to practice English, not just those related to presentation.</p> <p>Participating to negotiate: (5 or 10 minutes in week 1 or 2) Option 1: Art from Scrap. Elaborate one or two pieces of art with wastes that come from your house or school and are not part of a recycling process. Describe your work of art and explain how you made it. Describe the problem that those wastes cause, where you got them from, how these works of art help the environment. Explore other alternatives to deal with those wastes. Option 2: Our Green School/House. Write down a proposal in the form of an information bulletin with a series of sustainable activities that you will put into practice at home and/or school. Describe your practices. Tell about the problems that those practices are tackling. Talk about the necessary resources to carry out the practices. Describe the possible outcomes/results.</p>			<p>Adjust previous times listed above to allow 5 min each week.</p> <p>Group presentations can be week 5 or 6.</p>

Choose one mini project and get in groups of 3-4 participants and negotiate in order to plan the next phase. Gather information about environmental problems that you see at home and/or at school.

VIDEO SCRIPT

What is sustainability?

The United Nations says that sustainability focuses on meeting the needs of the present without compromising the ability of future generations to meet their own needs. In other words, sustainability means maintaining the world we live in. To achieve this goal, we must act responsibly. We shouldn't use up all the resources on the planet that future generations will also need. There are not enough resources to support the world's population. The resources available are limited, and these are exploited every day to construct buildings, to produce vehicles, to develop technology, in general terms, it is used to create pretty much everything.

Sustainability means that we should maintain these resources so that they last a very long time or even forever. Remember that our actions have a deep impact on the environment, and we need to protect it because future generations will depend on it.

According to mocomi.com, if you want to know if what you do is sustainable, you should ask yourself if you can do it forever. For example, whenever you use something made of plastic such as bags, bottles and containers, you should ask yourself the question: Can I do this forever? The answer is no because plastic takes millions of years to decompose and it takes up a lot of space on earth. The accumulation of plastic harms the environment and it also affects both people's and animals' health. The consumption of plastic is unsustainable and we should protect our environment from its harms.

What actions can actually contribute to sustainability?

You should avoid the use of plastic bags. Fix broken items instead of throwing them away. Recycle, reduce and reuse. Be a conscious consumer. Before you buy something, ask yourself the question: Do I need it, or do I want it? These are just some examples of sustainable actions. Remember that what you do can affect others, so act locally and think globally. Sustainability starts with you.

APPENDIX 12

Simple Ways to Reduce Your Carbon Footprint

Your “carbon footprint” is a measure of the impact your activities have on the amount of carbon dioxide (CO₂) produced through the burning of fossil fuels and is expressed as a weight of CO₂ emissions produced in tonnes.

Here are a few suggestions that every individual can take to reduce carbon emissions related to transport, food, use of energy in the home, water use, and waste management.

1.

Try one of the following ways to get to work or school: cycling, walking, carpooling, public transport.

Travel by train when you can.

Try to avoid short car journeys because fuel consumption and CO₂ emissions are disproportionately higher when the engine is cold.

Explore alternatives to flying.

Don't speed — speeding uses more gasoline and emits more CO₂.

Support programs that strengthen public transport systems.

2.

-  **Reduce intake of animal products.**
-  **Try not to waste food.**
-  **Eat local and seasonal produce.**
-  **Recycle organic waste.**

3.

Use a tumble dryer only when absolutely necessary. Drying clothes naturally is by far the best way to do it: your clothes will last longer and the energy provided is free and nonpolluting!

Use energy-saving light bulbs.

Turn down the cold. Air conditioners are real energy wasters. Fans might be an alternative, otherwise use air conditioners sparingly and look for the most energy-efficient model.

Switch to Energy Star® certified appliances, fans and electronics.

Reduce energy for water heating. Use cold water to wash your clothes, to take a shower, and to do the dishes.

Turn off and/or unplug your lights, TV, computer, and other electronics and appliances when you are not using them.

4.

-  **Boil less water and cover your pots while cooking.**
-  **Install new toilets that use less than 1.6 gallons per flush.**
-  **Avoid drinking bottled water.**
-  **Take a shower instead of a bath.**
-  **Turn off the tap.**
-  **Water plants early or late in the day to reduce evaporation.**
-  **Avoid using a hose when possible such as when cleaning floors and outdoor areas.**
-  **Find and repair leaks.**

5.

Recycle as much as possible.

Choose products that come with little packaging.

Lobby for appropriate recycling options in your community.

Buy intelligently.

Reuse your shopping bag.

Stop household burning of rubbish.

Teacher asks students the following question: What do you think that the most eco-friendly countries in the world are doing to reduce their carbon footprint? (Switzerland, France, Denmark, Malta, Sweden)</p> <p>Share the task with your students. Your school has a digital newspaper. This month, they want to publish about eco-friendly practices around the world. They have given you the task of reading a short article about an interesting eco-friendly practice or product. And you have to write down a summary of that article for the school newspaper. APPENDIX 1: Carbon Footprint Worksheet

Instructions: Answer the questions below. Then, write the corresponding values in the right column. See the example below. Add together all the values in the right column to find out what your carbon footprint is. Only fill in one value for each question, unless otherwise stated.

Ex. Do you turn off the lights when you leave a room?	a. 133	<u>133</u>
a. Yes	b. 268	_____
b. No		_____

- How do you get to school?
a. On foot a. 0 _____
b. By bike b. 0 _____
c. By car c. 1115 _____
d. By bus d. 131 _____
e. Carpool e. 459 _____
f. By motorcycle f. 547 _____
- What do you mostly eat?
a. fast food a. 4818 _____
b. home cooked food b. 629 _____
- What do you mostly eat?
a. vegetables/fruits a. 153 _____
b. meat b. 644 _____

c. don't have/use one c. 0 _____
- Do you turn off your video game system when you're not using it?
a. yes a. 29 _____
b. no b. 90 _____
c. don't have/use one c. 0 _____
- Do you recycle? (for this question, select all that apply)
a. magazines a. -15 _____
b. newspaper b. -90 _____
c. glass c. -7 _____
d. plastic d. -19 _____
e. aluminum and steel cans e. -86 _____

This total is an estimate of your carbon footprint and shows the number of pounds of carbon dioxide you produce annually. The lower the number, the fewer greenhouse gasses emitted into the atmosphere.

What is an eco-friendly brand?

A new eco-friendly era is rising, and it is reaching every corner of the world.

Organisations of all sizes are quickly discovering that today's consumers want more than just the right products and services. Your clients want to feel as though they are spending their money on a brand they can feel good about. As a result, the top eco-friendly companies are currently the ones with the most marketplace power.

More than 90% of today's CEO's believe that sustainability is essential to success. As consumer groups continue to publish studies about the rising demand for more environmentally-friendly practices in business, it is easy to see why green initiatives are becoming so important. Eco-friendly brands are the companies that recognise some of the biggest threats facing our planet and know how to come up with unique ways of overcoming those issues. These organisations do not just use recycled packaging or turn their thermostats down during the winter. Many of the most eco-friendly brands are also investing in new initiatives that change the way they operate on a fundamental level. Look at Seventh Generation, for instance. This cleaning-product company transformed the cleaning industry with products that completely eliminate the harmful toxins and chemicals that other businesses in the sector have relied on for decades. To become one of the world's most socially conscious brands, the business had to start from scratch and find their own unique formula for cleaning. However, the results of the company's hard work were significant. Seventh Generation recently topped Forbes' annual "Best for the Environment" list. The trend is spreading to the business leaders of tomorrow, too. Around 88% of business school students say that they think social and environmental issues are crucial to business branding. Additionally, more first-time entrepreneurs are basing their USPs and points of differentiation on environmental protection.

Costa Rica Achieves Two New Records in Sustainability Effort

By Laura Alvarado, July 26, 2017

APPENDIX 5
In just the first half of 2017, Costa Rica has reached a new record in clean energy production and received their latest Biosphere Reserve declaration by UNESCO (United Nations Educational, Scientific and Cultural Organization)—solidifying their strong commitment to sustainability.

<https://theculturetrip.com/central-america/costa-rica/articles/meet-the-heroes-of-costa-rica-leading-the-way-for-sustainable-tourism/>
During the first six months of the year, 99 percent of Costa Rica's electricity came from renewable sources, according to data from the National Energy Control Center (CENCE). In the last 30 years, renewable sources such as wind, geothermal, solar and hydroelectric have been responsible for production of nearly 93 percent of Costa Rica's energy, but this July they broke their own record. With a goal to be the first carbon neutral country in the world by 2021, sustainable practices can be observed in every region of the country, across all industries, adopted by all citizens and embraced by visitors. With almost all of its energy being produced by renewable resources, it's clear that sustainability is embedded deeply in the culture and traditions of Costa Rica.

Another win for sustainability was earned in June, when UNESCO declared Savegre River, located in the Zona de los Santos (Zone of the Saints), a Biosphere Reserve. Biosphere reserves are specially designated areas for sustainable development that reconcile the conservation of biodiversity with the proper use of natural resources. As stated on the UNESCO website: Biosphere reserves are 'Science for Sustainability support sites' – special places for testing interdisciplinary approaches to understanding and managing changes and interactions between social and ecological systems, including conflict prevention and management of biodiversity. Costa Rica already has four reserves, but this is the first with coastal marine components, as it includes the marine part of the Manuel Antonio National Park, in Quepos.

It is clear that Costa Ricans are proud to live amongst and protect their country's rich environment. The small nation holds five percent of the world's known biodiversity, 3.5 percent of all marine life and 30 percent of the country's territory is protected natural land. A pioneer in the area of sustainability, Costa Rica is a model for sustainable practices for many industries around the world. Through the Certification for Sustainable Tourism (CST) program, which was designed by the Costa Rica Tourism Board (ICT), entrepreneurs can receive recognition and reward for their sustainable practices to help differentiate businesses within the tourism sector. Based on the degree in which they comply with a sustainable model of natural, cultural and social resource management, a large selection of attractions, hotels and restaurants can be officially classified as sustainable.

APPENDIX 4 Expository Paragraph Example

How are English and Chinese Languages different

Chinese differs from English in several ways, and these differences make learning English difficult. First, the most complex difference is the word order. For example, in English, a greeting is “How are you?” but in Chinese, the same greeting is “You are how?” Beside this important difference, Chinese and English have many small differences. Chinese, for instance, does not distinguish between “he” and “she”, as there is in English which can be embarrassing. For these reasons, many Chinese born students make errors in their spoken and written English making it difficult to master.

Introducing

T explains the topic of active vs. passive voice by using the following chart.

Passive Voice Chart

Active voice	Passive voice
<p>Tells us what a person or thing does. The subject performs the action (verb) on the object.</p> <p>Subject + verb + object</p> <p>Example:</p> <ul style="list-style-type: none"> • Anna painted the house. • The teacher always answers the students' questions. • Ali posted the video online. 	<p>Tells us what is done to someone or something. The subject is being acted upon.</p> <p>Object + verb + subject</p> <p>Example:</p> <ul style="list-style-type: none"> • The house was painted by Anna. • The students' questions are answered by the teacher. • The video was posted online by Ali.

Then, T models more sentences by using the unit vocabulary and theme. After that, learners work in pairs and create sentences using each app following the pattern of passive voice. For example

- ✚ Instagram was created to post your photos.
- ✚ WhatsApp and Messenger were designed to chat with friends.

Then, learners share their sentences with another couple of classmates.

Then, they read some statements and tell if they are true or false. After that, they write a reason to support each answer.</p> <div data-bbox="1050 617 1417 1096" style="border: 1px solid black; padding: 5px;"> <p>Protecting your identity</p> <p>When someone steals another person's private information, such as their date of birth, passport or banking details, it is called identity theft. If that information is obtained and used by the thief for their own financial benefit, it is called identity fraud.</p> <p>There are many types of identity fraud. A criminal stepped in a traffic offense may avoid going to court or paying a fine by presenting a stolen driver's license to the police. Stolen forms of identification can be used in a number of ways, for example to order goods or to set up mobile phone contracts. And while cyber-criminals often use stolen information to transfer money from a victim's bank account, the information may also be used to take out bank loans or credit cards in that person's name. It is not unusual for the victim to remain unaware that their personal information has been stolen until they apply for a credit card or a loan themselves. In 2012, almost 140 million people lost to credit card identity theft in the UK.</p> <p>Identity theft and fraud are not new problems but, with the rise of the Internet, they have become significantly more common. In the early days of the Internet, online security was not as advanced as it is today and people were less concerned about how to protect their personal information online.</p> <p>Different methods are used to trick people into revealing their banking information. Some of these are quite simple, while others are more sophisticated. Many people have been deceived by websites that are designed to look exactly like their bank's site. There are 100 phishing websites aimed at banks and building societies in the UK. By August 2012, that number had risen to 124 sites. The victims of phishing scams are often individual members of the public, but entire organisations can be hit, too.</p> <p>In 2012, one British woman was robbed of her life savings (over £1,000,000) when she fell for a phishing scam. Fortunately, the criminal - in this case, a gang of fourteen people - were later caught and arrested. In 2014, the hotel near-reviews website, Booking.com, was hit by a major phishing scam which affected about 10,000 people. The company paid full refunds to every customer who had lost money, and made important changes to its technical security features. Phishing is also frequently done by email or over the phone. The scammers, or cyber-criminals, try to be from a genuine bank or company and persuade the victim to reveal their account information or password.</p> <p>Identity theft and fraud can be very stressful experiences. Always take a cautious approach whenever anyone requests your personal information. While it could be said that some victims of phishing and identity fraud have not been cautious enough, it should be noted that many cyber-criminals are extremely clever and convincing.</p>  </div> <p>Taken from: https://es.liveworksheets.com/worksheets/en/English as a Second Language (ESL)/Passive voice/Reading comprehension and passive voice_rp1326052ap</p>	<p>60 min</p>
---	---	---	---------------

ARE THESE SENTENCES TRUE (T) OR FALSE (F)?

- 1 According to the article, a criminal could get away with not paying a traffic fine by presenting a stolen driver's licence to the police.
- 2 Most victims of identity theft never find out that their information has been stolen.
- 3 The arrival of the Internet has increased the cases of identity theft and fraud.
- 4 Phishing scams are limited to individual members of the public.
- 5 All phishing scams are carried out by phone.
- 6 It's important to be extremely careful because cyber-criminals are usually very smart.

Pair/Group feedback

In groups of four, learners check the answers and reasons. Learners help each other if finding difficulties to solve the exercise or problems understanding vocabulary words.

Reading for the second time

In pairs, learners match the correct statements, and they decide if each statement is in active or passive voice. After that, they choose the correct verb to complete some sentences.

GRAMMAR: *Present Tenses: active and passive*

1 Match the sentence halves to make correct statements.
Then decide if each statement is active (A) or passive (P).

- | | |
|------------------------------------|--|
| 1 These days, many people are | a different identities on different sites. <input type="text"/> <input type="text"/> |
| 2 Others share lots of personal | b are checked by potential employers. <input type="text"/> <input type="text"/> |
| 3 Experts are advising | c hiding their real identity online. <input type="text"/> <input type="text"/> |

| 5 Privacy settings are being | e increased by many Facebook users today. <input type="text"/> <input type="text"/> |
| 6 Sometimes, social media accounts | f information on social-networking sites. <input type="text"/> <input type="text"/> |

2 Choose the correct form of the verb to complete the sentences.

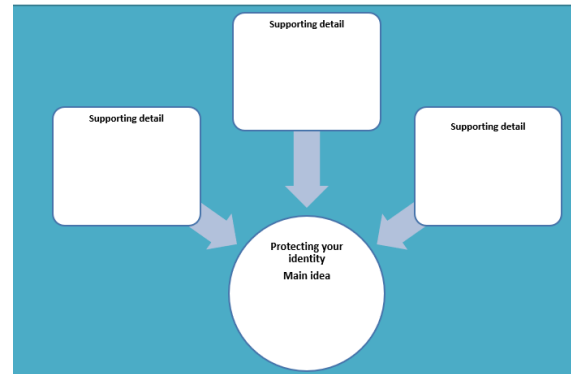

- Nowadays, more and more companies *are being used / are using* video ads to boost their online identity.
- These video ads *are posted / are posting* on major websites such as newspaper sites or TV channels.
- Video ads *post / are being posted* on social-networking sites, too.
- Over 12% of all videos that *are being viewed / are* viewing online are video ads.
- One video advertising company, LiveRail, *is posted / is* posting more than seven billion video ads a month.
- LiveRail *is being owned / is owned* by Facebook.
- It *is believed / believe* that Facebook paid more than \$400 million for LiveRail.

Finally, learners read the text again, and extract the main idea and supporting details to complete the following graphic organizer.

Distinguishes supporting details in factual texts and simple reports on familiar topics (e.g., movie review, interviews, and meeting agendas).

Post-reading

Learners discuss the *Topic Boosters* on page 2 in a line up activity. Learners form two straight lines parallel to each other. Each learner in line #1 faces a partner in line #2. Then, learner from line#1 asks a recall or a thinking question. He/she provides time for learners to state an answer. After one 30 seconds one student from line #1 moves to the end of the line while all the other Ls from line #2 move up one place in line facing a new partner.

Topic Boosters

In what ways would you (not) consider the ~~Gayometer~~ *Pro* app offensive?

Can you come up with a creative concept of a game or challenge that could be sold as an app on portable devices? Feel free to brainstorm ideas with your partner.

Imagine situations where the ~~Stalker~~ *Stalker* app would come in handy and mention possible ways of misusing the app.

To what extent would you consider the ~~Beoblogs~~ *Beoblogs* app ethical/unethical? Theoretically speaking, would you be interested in using it? Why/why not?

Do you know other GPS related apps that help you find your way around at unknown places? Which?

Argue in what ways you believe the *Can I Drive Yet* app (not) to be helpful in reducing the number of car crashes around the globe.

Integrated Mini-Project		Time
<p>Allow time for the Mini-Project each week. Protecting your identity

When someone steals another person's private information, such as their date of birth, passport or banking details, it is called *identity theft*. If that information is obtained and used by the thief for their own financial benefit, it is called *identity fraud*.

There are many types of identity fraud. A criminal stopped for a traffic offence may avoid going to court or paying a fine by presenting a stolen driver's licence to the police. Stolen forms of identification can be used in a number of ways, for example to order goods or to set up mobile phone contracts. And while cyber-criminals often use stolen information to transfer money from a victim's bank account, the information may also be used to take out bank loans or credit cards in that person's name. It is not unusual for the victim to remain unaware that their personal information has been stolen until they apply for a credit card or a loan themselves. In 2013, almost £40 million was lost to credit card identity theft in the UK.

Identity theft and fraud are not new problems but, with the rise of the Internet, they have become significantly more common. In the early days of the Internet, online security was not as advanced as it is today, and people were less informed about how to protect their personal information online.

Different methods are used to trick people into revealing their banking information. Some of these are quite simple, while others are more sophisticated. Many people have been deceived by websites that are designed to look exactly like their bank's site. These are called *phishing* websites. In August 2005, there were 160 phishing websites aimed at banks and building societies in the UK. By August 2012, that number had risen to 41,734 sites. The targets of phishing scams

are often individual members of the public, but entire organizations can be hit, too.

In 2012, one British woman was robbed of her life savings (over £1,000,000) when she fell for a phishing scam. Fortunately, the criminals – in this case, a gang of fourteen people – were later caught and arrested. In 2014, the hotel reservations website, Booking.com, was hit by a major phishing scam which affected about 10,000 people. The company paid full refunds to every customer who had lost money, and made important changes to its technical security features. Phishing is also frequently done by email or over the phone. The sender, or caller, pretends to be from a genuine bank or company and persuades the victim to reveal their account information or password.

Identity theft and fraud can be very stressful experiences. Always take a cautious approach whenever anyone requests your personal information. While it could be said that some victims of phishing and identity fraud have not been cautious enough, it should be noted that many cyber-criminals are extremely clever and convincing.

ARE THESE SENTENCES TRUE (T) OR FALSE (F)?

- 1 According to the article, a criminal could get away with not paying a traffic fine by presenting a stolen driver's licence to the police.
- 2 Most victims of identity theft never find out that their information has been stolen.
- 3 The arrival of the Internet has increased the cases of identity theft and fraud.
- 4 Phishing scams are limited to individual members of the public.
- 5 All phishing scams are carried out by phone.
- 6 It's important to be extremely careful because cyber-criminals are usually very smart.

This activity is great for speculative language. T shows the learners some very close-up pictures that he/she took with his/her smartphone. This can be done very quickly by going into the classroom or looking around the teacher's desk and taking very, very close-up pictures of different objects (technological devices). After that, T shows them to the students and asks them to guess what they are. Another way to do this, it is displaying these pictures using a projector, or pasting the pictures on the board. The idea is to take close-up photos, so that learners have difficulty recognizing them.</p> <p>Example: What is this? (Affirmative and Negative Statements, Yes/No questions, and Wh-questions) with examples in context and to the theme and vocabulary for this unit.</p> <p>Finally, T gives learners an envelope with some paper strips with different parts of sentences. After that, T explains the grammar aspect related to noun phrases by using the chart below and then models some sentences combining noun phrases and the previous vocabulary. See examples.

NOUN PHRASES

Definition: A noun phrase refers to words that work the same way as a noun. A noun phrase features a noun, pronoun, and other modifiers.

COMPONENTS OF A NOUN PHRASE
I want **a** **cute** **puppy** **for** Christmas.

NOUN	ARTICLE	ADJECTIVE	PREPOSITIONAL PHRASE	DETERMINER
A noun phrase must have a noun on which other modifiers are connected. A noun refers to the name of a person, thing, or place. <i>The doctor took the drugs to the hospital.</i>	An article must be part of a noun phrase since it is usually connected to a noun. In modern English, articles include a, an, and the. <i>The office is always clean.</i>	An adjective refers to a word that describes a noun or pronoun. <i>The handsome man married today.</i>	It refers to words that begin with a preposition but has an object at the end. <i>The clothes in the dressing room are gorgeous.</i>	A determiner clarifies/describes a noun. Examples include; those, these, that, this. <i>Those girls are beautiful.</i>

FUNCTIONS OF NOUN PHRASES

Noun phrases can be; a subject, direct object, indirect objects, complement, and object of a preposition.

- A subject is a component of a clause or sentence that describes what the sentence/clause is about.
- A direct object refers to a noun phrase, noun, or pronoun that is a recipient of a direct action of a verb.
- An indirect object identifies the person to whom or for whom a verb action is done.
- A complement gives details about a noun. A complement follows verbs like; am, will, is, were, was, are.
- A prepositional object refers to a pronoun, noun, or noun phrase that precedes a preposition in a sentence.

The use of **internal social networks** within your organization has the potential to make a huge difference within your organization. They provide a way for employees to interact and develop as well as give leadership insight into who their employees are and what makes them tick. By interacting with their employees and paying attention to the employees' interactions, leadership can use the information provided by their social network to improve employee experience as well as customer experience and benefit their company as a whole. Because social networks are dual purpose, they really do allow for a heightened level of employee interaction and input.

Here are a few specific ways that social networks can benefit you and your employees:

5 Benefits of Social Networks at Work

Engage and Build Relationships

Leadership within any given organization should always be looking for ways to increase their employees' loyalty and raise morale. Both of these things are likely to happen when employees are given resources to build relationships with their peers as well as leadership. Social networks allow your employees to branch out further than the immediate surroundings of their departments. They are able to interact and network with people in other departments that they don't usually see. By empowering your employees to build these relationships, you strengthen your company as a whole when your employees feel better connected and more in the loop.

Communicate Effectively Beyond Email and Phone

Some phone calls go unanswered and some email unread. Through the use of a social network you are able to bring in a **new channel of interaction** that may allow for certain topics to be better addressed. Social networks often allow for more of a conversation and it is less likely for important topics to be missed or swept under the rug when they are all out there for the world to see.

Provide Companies with Trends and Analysis

An internal social network can provide endless information regarding employee satisfaction and other similar trends. The amount of data that is available to employers from employee activity, search and interests can help organizations learn more about employee interests, engagement levels, peak work times and productivity, and types of content and conversation drives the most interest from your employees. When that information is collected and analyzed, employers are then able to make necessary changes to increase satisfaction and capitalize on these trends.

ASYNCHRONOUS WORK & HOW SPINOR SUPPORTS BLACK

Foster Self-Development, Learning and Discovery

Many employees want to be responsible for their own careers, paths and development. Social networks provide a great vehicle for learning and **professional development**. Social networks provide a basis for comparison, a time for self-development, reflection and thought. Employees can compare their careers, interests and activities with their peers, learning more about the opportunities that may be available within the organization and hopefully driving them to want to do more and work harder to get there.

Create, Elevate and Foster **Organizational Culture**

Employees are generally reminded on a daily basis the different programs and culture of the organization via email and other **communication**. A social network can function as a positive reinforcement of this information while also generating discussion around the topics and even encourage a deeper understanding.

As your employees become more comfortable with and internal social network and begin to use it more, you will see a lot of opportunity to make your company a better place. Your employees are what make your company successful so by listening, interacting and making efforts to increase loyalty and satisfaction, your employees will want to continue to use these networks to better their own experiences and benefit the company they work for.

Once the company is created, learners will imagine they will participate in a fair in which they have to present their company to find sponsors and budget to support their business. Learners will explain and justify the reasons why their company is unique and deserves to be supported. One of the company's main advantages is the skills of their software engineers in charge of creating their products and give services.

Organizing

Learners select the appropriate oral and visual forms to share the information they planned before in a well-organized presentation using relevant sentence frames and connecting words covered in the unit.

		<p>Rehearsing Learners practice with the oral and visual forms prepared before. T helps them by giving feedback correcting mistakes like grammar, vocabulary, pronunciation, and intonation among others.</p> <p>Learners can watch the following video called “Introduction to Stress and Intonation - English with Jennifer” in the following link taken from https://www.youtube.com/watch?v=kIapQVNq3D4 T can also use the QR code on the right side.
